Outline of the Graduate School of Integrated Arts and Sciences

1. The Graduate School of Integrated Arts and Sciences was founded in April 2006 with the School of Integrated Arts and Sciences, Hiroshima University, as its basis. The Graduate School offers graduate students the opportunity to practice integrated arts and sciences, and to develop comprehensive knowledge and the ability to think. Integrated Arts and Sciences is an academic field where one inquiry into an individual academic subject, and also explores ways to unite or cooperate across subjects and extend the horizon of intelligence so as to confront multiple problems in the 21st century. The curriculum of the graduate school helps a student study one subject area of her/his interest extensively, and obtain specialized knowledge and skills. At the same time, the teaching of the graduate school aims at training specialists with general knowledge, who are highly skilled in academic, comprehensive, and creative techniques; and are able to objectively assess their goals from academic and comprehensive perspectives.
2. The Graduate School, for the purpose of conducting inter-disciplinary teaching and research, consists of three divisions: Human Sciences, Environmental Sciences, and Cultural Sciences, and one Project Group, the 21st Century Science Project Group. The graduate program is an accumulative course consisting of a 2-year Master's Program and a 3-year Doctoral Program. The three divisions and one project group are as follows:
 - i. Human Sciences: The department draws on a variety of natural science areas such as life and brain science, psychology, sports science, linguistics, philosophy and ethics, and aesthetics and arts, in order to academically and comprehensively understand the essence and universality of humanity. It makes full use of methods in natural science and human science, and explores the theme, *What is humanity?*
 - ii. Environmental Sciences: In order to academically and comprehensively understand the environment in the fields of nature, society, materials, information, and life, the department aims at analyzing the processes of environmental formation and assessing them from diversified facets, and through these practices, it explores multiple risks in current society with the theme, *How should humans co-exist with the environment?*
 - iii. Cultural Sciences: The department aims to academically and comprehensively understand the repeatedly occurring conflicts and dialogues of civilization with a background of history and regions. For this purpose, it explores both synchronic and diachronic aspects of civilizations and cultures using methods of integrated sciences, and investigates the theme, *How should intellectual assets be passed on?*
 - iv. 21st Century Science Project Group: The goal of the project group is to discover and investigate multiple issues which human society of the 21st century confronts, and to approach the issues academically and comprehensively in order to solve problems effectively. The project group consists of joint teams of researchers and students who share the same goals. Currently eight research themes are undertaken by these teams: "Language and Information Studies," "Civilization and Nature Studies," "Risk Studies," "Natural Resources and Energy Studies," "Elements-System Studies," "Hiroshima's Reconstruction," "Environmental Peace Studies," and "Hiroshima Korean Studies."
3. The Graduate School curriculum offers academic and comprehensive learning, and consists of Common Core courses and Project Groups across different divisions, fields, and specialities. After admission, a student is advised to select a specialized course among the above three divisions and one project group. A student who has selected a Project Group is also eligible for an academic degree.
4. "Research Manager Training Program of Integrated Arts and Sciences" offering a training program , etc. is open to all students in the Graduate School of Integrated Arts and Sciences regardless of their divisions or project.
5. The Graduate School curriculum, including both the Master's Program and the Doctoral Program, is open to applicants such as mature/working members of society or degree holders in other academic areas. After admission, special consideration is made for them in terms of course requirements.
6. Successful completion of the Master's Program results in the award of Master of Arts and Sciences, and successful completion of the Doctoral Program results in the award of Doctor of Philosophy.
