

Egypt science and education connect to Hiroshima and deliver peace message to the world

Dr. Khaled Atef Abdel Ghaffar: Minister of Higher Education and Scientific Research in Egypt

Mitsuo Ochi, President of Hiroshima University

In order to fulfill its mission to create a diversified, free and peaceful global community, Hiroshima University aims to cultivate “peace-pursuing, cultured individuals with an international mindset and a challenging spirit”.

This time, we organized a series of lectures titled “Peace Lecture Marathon” where government representatives and ambassadors in Tokyo are invited to give a lecture on peace. With these lectures as momentum, we hope that new generations, who are currently enjoying prosperity in the City of Hiroshima, which has been reborn from the atomic destruction of World War II as a world-class city with natural scenery, learn a lot about the importance of peace and our history of hardship.

Dr. Khaled Atef Abdel Ghaffar:

Minister of Higher Education and Scientific Research in Egypt

After graduating from the Faculty of Oral and Dental Medicine, Cairo University, Dr. Khaled Atef Abdel Ghaffar initiated his career as a general practice dentist in 1985. Then, he steadily has developed his career as a research scholar, as well as a professor cultivating young talents at several renowned universities such as Cairo University and Ain-Shams University. During his brilliant career, he accomplished a lot of honors and recognitions such as IADR Edward Hatton Award for Best Research – Seattle Washington (1994). Currently, he is fulfilling lots of momentous responsibilities, such as being the Minister of Higher Education and Scientific Research in Egypt, Vice President of Ain Shams University for Postgraduate Study & Research, and so on.
