The 73rd Food and Environment Economics Seminar

(5研究科共同セミナー/The Kyodo Seminar of 5 Graduate Schools)

# Sustainable Rural Development: Looking through the perspectives of agricultural innovation systems

"The Agriculture Innovation System (AIS) is a network of organizations, enterprises, and individuals focused on bringing new products, new processes, and new forms of organization into economic use, together with the institutions and policies that affect their behavior and performance, that is, the way different agents interact, share, access, exchange and use knowledge."
