# Admissions Policy <Master's Course>

The Graduate School of Integrated Sciences for Life, based on its Diploma Policy and Curriculum Policy, expects to admit master's students as described below.

Students who:

1. Have strong eagerness to learn, who wish to acquire deep expertise and understanding in a wide range of fields from the basics to applications that include medical treatment in the areas of study related to biology and life sciences, and who have basic academic knowledge for that purpose;
2. Wish to acquire interdisciplinary problem-searching and problem-solving abilities, which can integrate and link different fields, along with broad general education, without being constrained by conventional frameworks of research fields, and to create "science that can guide sustainable development"; and
3. Are aware of both academic fields and the real world, and who wish to acquire international and interdisciplinary communication skills as well as practical capabilities in society.

## 1. Type of Students We Seek

### [Program of Biotechnology]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have acquired an education at the level of completing a university course and basic knowledge in biological sciences and bioengineering as their special field of study;
2. Have a high level of interest in the bioengineering field, as well as the ambition and strong will to carry out research to its end;
3. Have a logical thinking ability and communication skills to verbally express their logical thinking;
4. Have an undergraduate of university-level command of English; and
5. Have acquired common sense and ethical standards as a working member of society.

### [Program of Food and AgriLife Science]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a high level of interest in theories and methods of understanding and utilizing foods and biological functions from the perspective of molecules and cells;
2. Have a high interest in finding and solving problems from a scientific perspective regarding creatures' diverse functions and the advanced use of food resources;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
4. Have acquired abilities at the level of completing a university course or higher regarding the knowledge, attitude, and skills related to their desired foods and life science fields; and
5. Have acquired common sense and ethical standards as a working member of society.

### [Program of Bioresource Science]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a high level of interest in systematically understanding life phenomena related to the production and use of biological resources based on the studies from the molecular level to ecosystems basis;
2. Have a high interest in understanding and dissolving various problems in the production of biological resources from regional to global scopes regarding roles and trends of biological resources in food production, their application to human life, and their relationships with the natural environment;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
4. Have acquired abilities at the level of completing a university course or higher regarding knowledge, attitude, and skills related to their desired biological resources and science fields; and
5. Have acquired common sense and ethical standards as a working member of society.

## **[Program of Life and Environmental Sciences]**

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a broad interest in the life science fields from the molecular level to whole environments and ecosystems, and who wish to acquire basic research abilities for a specific field and to learn the theories and methods of understanding and utilizing these abilities from a comprehensive perspective supported by related expertise and skills;
2. Wish to understand various problems existing in life science and environmental science, and to solve them in cooperation with organizations outside the university and the international community;
3. Wish to play an active role as a generalist who covers areas outside life science and environmental science without being constrained by their own expertise;
4. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
5. Have acquired abilities at the level of completing a university course or higher regarding knowledge, attitude, and skills related to their desired specialized fields; and
6. Have acquired common sense and ethical standards as a working member of society.

## **[Program of Basic Biology]**

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have acquired basic knowledge and skills in biology at molecular, cellular, individual, ecological, and evolutionary levels that should have been acquired in the related faculties;
2. Have a command of English strong enough to make a presentation on their own research in English; and
3. Have acquired common sense and ethical standards as a working member of society.

## **[Program of Mathematical and Life Sciences]**

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Are equipped with basic academic abilities in the fields of mathematics, physics, chemistry, and biology;
2. Have an ambition to open up a new research field for the mathematical science, molecular science, and life science fields as well as integrated fields; and
3. Have acquired common sense and ethical standards as a working member of society.

## **[Program of Biomedical Science]**

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have an interest in medical and scientific knowledge that can support people's health and longevity, and who aspire to contributing to the development of life science, medical science, and related industrial fields;
2. Can view health and pathologic conditions multilaterally from a basic biological perspective; and
3. Have acquired common sense and ethical standards as a working member of society.

## **2. Basic Policy regarding Admissions Screening**

The Graduate School of Integrated Sciences for Life, consisting of the program of Biotechnology, the program of Food and AgriLife Science, the program of Bioresource Science, the program of Life and Environmental Sciences, the program of Basic Biology, the program of Mathematical and Life Sciences, and the program of Biomedical Science, aims to develop postgraduates equipped with the abilities required to pursue a wide range of career paths after completion of their studies. In light of the educational goals and objectives specified in the diploma and curriculum policies of individual departments, we will implement admissions screening based on our diploma policy and curriculum policy, and evaluate individual applicants from a comprehensive and multidimensional perspective. We will also clearly specify the qualities required of students for admission and the evaluation methods.

## 2. Applicant Eligibility

Applicants must satisfy one of the following qualifications or be expected to receive any one of the following qualifications by March 31, 2021. Applicants shall be residing in Japan and must make an affirmation of admission when applicants will pass the entrance examination.

- (1) have graduated from a Japanese university;
- (2) have completed a 16-year course of formal education outside Japan;
- (3) have taken a correspondence course from an overseas educational institution in Japan and completed a 16-year course of formal education;
- (4) have completed an undergraduate course of an overseas-based educational institute located in Japan that has been approved by the Minister of Education, Culture, Sports, Science and Technology (MEXT), whose graduates are regarded as having completed 16-year course of formal education.
- (5) have been conferred, a degree equivalent to a bachelor's degree through attending an overseas university or other overseas school (limited to those whose education and research activities have been evaluated by persons who have been certified by the relevant country's government or a related institution, or have been separately designated by the Ministry of Education, Culture, Sports, Science and Technology as being equivalent to such) and graduated from a course that requires 3 or more years to complete (Includes graduating from a course implemented by the relevant overseas school while living in Japan through distance learning, as well as graduating from a course implemented by an educational facility established with the relevant overseas country's school education system and has received the designation mentioned above).

Be sure to contact each support office in charge of the program before the application period, if you think you have academic achievements equivalent to or higher than those having completed an undergraduate course at a university.

## 3. Application Procedures

### (1) Application methods

Applicants are required to apply using “online application system”, and send the necessary documents by post. (Partially online application hereinafter referred to as “online application”)

#### <Online application>

- 1) Enter your personal information.
- 2) Pay the application fee, 30,000 yen.
- 3) All application documents must be either sent by mail or delivered in person to the aforementioned address.

**Note:** Online application, entering necessary information on the website and paying the application fee, is the initial registration process, and doesn't mean the completion of the application procedure. **The application procedure wouldn't be completed without either sending or delivering in person all the necessary application documents by the due date.** Be sure to send or bring in person all the necessary application documents to the support office (the aforementioned address). Application documents must arrive within the specified period at the support office. Fully paper-based application without registering online application cannot be accepted in this graduate school.

### (2) Application period

Applicants must complete all of the above procedures (from 1 to 3 in (1)) within the application period.

**From November 10, 2020 to November 17, 2020 (No later than 17:00 (JST))**

### (3) Online application

#### ◆Inquiries regarding entrance examination system

Online Application Helpdesk (\*Japanese speaking only)

Inquires accepted from 10:00 am to 6:00 pm (\*Except Saturday, Sunday and national holidays until July 31)

Tel: 050-3786-5124

UCARO Support Office (\*Japanese speaking only)

Inquires accepted from 10:00 am to 6:00 pm (\*Except from December 30 to January 3)

TEL: 050-3786-5524

- If you have any questions regarding the entrance examination, please contact the support office stated on page 4 in these guidelines. Inquiries are accepted from 8:30 to 17:00. (Excluding Saturday, Sunday, and national holidays)

**<How to apply > Complete the following eight steps within the application period stated below:**

**Step 1: Access the online application system**

Access the online application system from the Hiroshima University Admissions Information web page:  
<https://www.hiroshima-u.ac.jp/en/nyugaku>

**Step 2: Select 'Membership Registration' on the UCARO log in screen.**

Hiroshima University uses the UCARO website for the process from the application to enrollment procedures. UCARO is an Internet application and enrollment procedure support system. Account registration for UCARO is required for all applicants (free of charge) and it enables applicants to use the above online application system and complete the enrollment procedures.

**Step 3: (If you have, otherwise, skip 3) Enter the Account**

Enter the alphanumeric code (consisting of 8 or more characters) which you received from the Graduate School.

Applicants who wish to exempt the entrance examination fee should contact the support office (page 4) before applying. Those applicants who are judged to be applicable will receive the Account.

**Step 4: Input your application data into the Internet application system**

Follow the instruction on the screen and enter your name, address, etc.

**Step 5: Confirm the necessary documents and uploaded your photo**

Confirm the necessary documents when they are shown and upload a digital photo of yourself.

**Step 6: Payment of entrance examination fee (JPY 30,000)**

Choose the method of payment from the following list. For applications from outside Japan, only credit card payments can be accepted.

1. Credit Cards: VISA, MasterCard, JCB, AMERICAN EXPRESS, Diners Club
2. Convenience Stores: 7-Eleven, LAWSON, MINISTOP, FamilyMart, Daily Yamazaki, Seicomart
3. Banking facilities' ATM 【Pay-easy】
4. Online Banking

(Note)

**\*In addition to the entrance examination fee, applicants must cover the remittance fees.**

\*Applicants need to pay 500 Japanese Yen as the Processing Fee.

**Important notices regarding the entrance examination fee**

The examination fee, once paid, will not be refunded for any reason.

However, in cases (1) and (2) below, the examination fee is refundable after deducting the bank transfer fee. Therefore in such cases, please clearly write the "reason for demand of refund", "name", "postal code", "address", "transfer destination information" and "contact telephone number" in the prescribed format given from the university and send it to the address mentioned page 4 by postal mail by Friday, February 26, 2021 (In any case, the Online Application Processing Fee is ineligible for a refund.).

(1) If the application documents have not been submitted, or if they have not been accepted

(2) If duplicate payments of the entrance examination fee have been made in error

### Step 7: Initial registration process complete (Your application is NOT completed yet.)

You will be issued with a Registration Number (not your Examinee's Number). Please make a note of it or to print out a copy of the computer screen showing the number. The Registration Number is needed for confirming the application details later, and for sending the application documents by post.

### Step 8: Submission of application documents

Submission Address: Each support office (see page 4)

All application documents must be either sent by registered mail or delivered in person to the support office. If you submit the application documents directly to the support office, application documents are accepted from 8:30 to 17:00 on a weekday. Please note that the office is closed on Saturday, Sunday, and national holiday.

If you send the application documents by mail, you must send them by registered mail and ensure that the documents reach the office by Tuesday, November 17, 2020. Should the application documents fail to reach the office by that date, however, those postmarked on or before Friday, November 13, 2020 can be accepted. On the envelope, please write "Application for the Program of ○○○○○, the Graduate School of Integrated Sciences for Life, Hiroshima University" in red ink.

#### (4) Documents to be submitted (Specified forms can be downloaded from the Home Page.)

A	Academic Transcripts	Should be prepared and signed by the president/dean of the university from which you have graduated and sealed securely.
B	Certificate of (Expected) Graduation	<p>Should be prepared and signed by the president/dean of the university from which you have graduated.</p> <p>*If you are a graduate or a current student of a university in China, please obtain the following document by requesting it at "中国高等教育学历证书查询(CHSI)" (<a href="http://www.chsi.com.cn/xlcx/bgys.jsp">http://www.chsi.com.cn/xlcx/bgys.jsp</a>), and submit it to us together with "毕业证书(Certificate of Graduation" and "学士(硕士)学位证书 (Bachelor/Master's Diploma)".</p> <ul style="list-style-type: none"> <li>• Graduates: Online Verification Report of Higher Education Qualification Certificate (教育部学历证书电子注册备案表)</li> <li>• Expected Graduates: Online Verification Report of Student Record (教育部学籍在线验证报告)</li> </ul> <p>Please note that applicants must pay the issuing fee for the Online Verification Report (2 元/ certificate) by themselves. Also be sure that there are 15 or more days left until the expiration date of the online verification at the time of its submission.</p>
C	Score Certificate of English Proficiency Tests (The certificate will be returned to you after confirmation by the office.)	<p>Submit a score certificate (original) of English language proficiency tests administrated by outside organizations. (*The score certificate must be ORIGINAL (not copy).)</p> <p>If you have score certificates of more than one test, you may submit them all. In that case, the highest score will be adopted.</p> <p>The types of tests should be any of the following:</p> <ul style="list-style-type: none"> <li>- TOEIC®Test</li> <li>- TOEIC®-IP (including College TOEIC®)</li> <li>- TOEFL®-PBT</li> <li>- TOEFL®-ITP</li> <li>- TOEFL®-iBT</li> <li>- IELTS™</li> <li>- The EIKEN Test in Practical English Proficiency (EIKEN)</li> <li>- Cambridge English</li> </ul>

		- GTEC (Limited to CBT type) - TEAP (4 skills) - TEAP CBT (4 skills)
<b>D</b>	Curriculum vitae	(Use the official form) All the schools/educational institutions you have enrolled in shall be written.
<b>E</b>	Research Plan	(Use the official form) Submit the research plan in master's course written in about 400 English words.
<b>F</b>	Return Envelope	A self-addressed standard-size envelope with appropriate postage (stamps)

**(5) Address for submission of application documents:**

Please see page 4 of these application guidelines.

**(6) Pre-arrangements for special needs applicants**

Those who require special consideration for taking examinations and/or pursuing an academic program due to a disability or other legitimate reason must first contact the Support Office (see page 4) and then submit a statement of information as described below (in free format) to provide advance notice so that necessary arrangements may be made.

(a) Period of statement submission: From October 28, 2020 to October 30, 2020

(b) Information to include in the statement

[1] Applicant's name, address, and contact telephone number

[2] Name of the last school attended, the name of program in which you wish to enroll, and the name of the expected academic supervisor

[3] Type and degree of disability (If you are being treated, please submit a medical certificate.)

[4] Requested consideration regarding examinations

[5] Requested consideration after enrollment

[6] Arrangements made at school(s) previously attended

[7] Description of daily life

#### 4. Examination Date and Time

Examination Date	Examination	Time
<b>December 19 (Sat.), 2020</b>	Interview (oral) (about 30 minutes/person)	<b>9:00-</b>

#### 5. Details of Examinations

In Interview (oral examination), applicants will be asked to discuss about the Bachelor's (graduation) thesis, research plan and its background (basic knowledge), and answer some questions. Details of the examination will be informed to the applicants on the exam day.

## 6. Screening Criteria

Screening will be based on the results of examination (interview) and foreign language proficiency. Applicants' grade transcripts and research plan will be reflected in the interview.

- (1) The score of the interview (oral examination) is 200 points. In the interview, basic knowledge of the specialized subject, understanding of his/her own graduation thesis, motivation for studying at the graduate school, and purpose of research will be evaluated.
- (2) 100 points will be allocated to foreign language proficiency.

Evaluation of applicants' foreign language proficiency will be based on the conversion to a maximum of 100 points according to the following conversion formula using score certificate of English language proficiency administrated by outside organizations submitted at the time of application.

Conversion formula

$$\text{TOEIC® Test} / \text{TOEIC®-IP} = 100 \times (\text{Score of TOEIC®} / 990)^{0.75}$$

$$\text{TOEFL®-PBT} / \text{TOEFL®-ITP} = 100 \times \{(\text{Score of TOEFL®} - 310) / 367\}^{0.75}$$

Score certificates for English language proficiency test other than the above, please check the conversion table below.

Conversion table of score for English language proficiency tests other than TOEIC® Test, TOEIC®-IP, TOEFL®-PBT, and TOEFL®-ITP

English Proficiency Tests Foreign Language Proficiency (Max. of 100 points)	Cambridge English	The EIKEN Test in Practical English Proficiency (EIKEN)	GTEC (Limited to CBT type)	IELTS™	TEAP (4 skills)	TEAP CBT (4 skills)	TOEFL iBT®
100	200 - 230			8.5 - 9.0			
97	180 - 199	Grade 1	1350 - 1400	7.0 - 8.0	375 - 400	800	95 - 120

21	100 - 119	Grade 3	270 - 689				

## 7. Announcement of Successful Applicants

**12:00 (expected), January 8 (Fri.), 2021**

- (1) Successful applicants' ID numbers will be released on the bulletin board belonging to each support office (page 4) and the website of the Graduate School of Integrated Sciences for Life, Hiroshima University.
- (2) The Graduate School will send letters of acceptance to successful applicants. If you do not receive the letter by Friday, January 15, even if your ID number is on the list of successful applicants, please inquire at each support office (page 4).
- (3) Please note that the announcement of the website will be unofficial. Official announcement will be made via the bulletin board and the letters of acceptance. The office will not accept inquiries by phone regarding the results of the examinations.

## 8. Enrollment Fee and Tuition Fee

Enrollment Fee: ¥282,000

Tuition Fee: ¥535,800 per year (¥267,900 per semester)

- (1) The enrollment fee, once paid, will not be refunded for any reason.
- (2) The enrollment fee and tuition shown above were correct as of April 2020. If they are changed, students must pay the revised amount.
- (3) Details of enrollment procedures, which will be conducted in mid-March 2021, will be notified later to successful applicants.

## 9. Hiroshima University Excellent Student Scholarships

To inspire students to study hard and to foster excellent human resources, Hiroshima University institutes its own scholarship system that supports students who show excellent performances at their research achievement and so on.

## 10. Personal Information

Applicants' personal information (name, date of birth, sex, etc.) provided for screening will be used solely for the purpose of screening, announcement of results, and enrollment procedures. After enrollment, the University will manage the information to use it for student support activities (filing applications for scholarships and for waiving/discounting tuitions, etc.), and survey and research activities (for instance, surveys and analyses of applicants in order to improve screening systems). The University shall neither appropriate the information for any other purpose nor provide it to individuals/groups other than faculty or staff members of the University.

## 11. Examination Information Disclosure

The disclosure of examination results (considered as personal information) may be requested in the following manner:

- (1) Obtain an examination information disclosure application form:  
Write to the address below, indicating on the envelope 入試情報開示申請書請求 or "Examination Information Disclosure Application Form Request," enclosing a self-addressed return envelope (long No. 3 type, 120 mm×235 mm) bearing the examinee's name, address and postal code and an 94 yen stamp.
- (2) Complete the examination information disclosure application form, and send by post the documents listed below between April 1 and May 30, 2021 (postmarked) to the address below.
  - ① Completed examination information disclosure application form
  - ② Original Examination Card for the admission examination of the Graduate School of Integrated Sciences for Life, Hiroshima University (a copy will not be accepted; the original Card will be returned at the time of information disclosure)

- ③ Self-addressed return envelope (long No. 3 type, 120 mm × 235 mm) bearing the examinee's name, address and postal code and a 414 yen stamp.

Disclosure Applicants may be requested to correct any submitted documents found to be inappropriate.

- (3) The Graduate School of Integrated Sciences for Life will send a notice of examination information disclosure to the Disclosure Applicant by simplified registered mail within 30 days from the receipt of the application form.

## 12. Additional Notices

- (1) **Prior to application, please consult about the research programs with a faculty member under whom applicant wishes to study.** (<https://www.hiroshima-u.ac.jp/en/ilife/research>)
- (2) Hiroshima University has established the university's Rules on Security Export Control in accordance with the Foreign Exchange and Foreign Trade Act and conducts strict examinations for acceptance of international students, etc. Therefore, please be advised that International applicants may be unable to receive their desired education or conduct their desired research due to the restriction by the above regulations.
- (3) The certificates to be submitted must be the originals or certified photocopies. Uncertified photocopies would not be recognized as official certificates.
- (4) No changes are permitted in the content of documents after their submission. The examination fee will not be returned for any reason.
- (5) Any forgery or falsification of the documents and/or academic fraud would result in cancellation of acceptance even after passing examination or admission.
- (6) If an applicant could not graduate from the university before the admission date, he/she would lose the eligibility to enter our graduate school in this session.
- (7) Application Guidelines and other related documents can be downloaded from the website of the Graduate School of Integrated Sciences for Life, Hiroshima University.
- (8) For further information, please contact the following each support office in charge of the program(s) (page 4).

## 13. Frontier Development Program for Genome Editing

Hiroshima University launched the Frontier Development Program for Genome Editing, an integrated Master's-PhD course, with the aim of training PhD students to introduce innovations to society. This program will establish the Life Science Course (5-year curriculum) and the Medical Course (4-year curriculum) in order to provide students with opportunities to acquire basic and applied knowledge and to learn techniques of genome editing. This program enables students to master genome editing technology and connect it directly to industry.

### ◆ Admission

Hiroshima University seeks students who wish to enroll in the Life Science Course (5-year curriculum) of the "Frontier Development Program for Genome Editing" in April 2021.

[Admission Requirements]

Those who have passed the entrance examination for April 2021 enrollment of the Master's Course in the Department of Integrated Science for Life of the Graduate School of Integrated Sciences for Life.

1. Prospective students of the program must pass the above-mentioned examinations as a first step.
2. All applicants must choose a prospective advisor from the list of faculty members and consult him/her about the relevance of the program to the activities they wish to conduct.

Please refer to the website for the admission information.

(URL : <https://genome.hiroshima-u.ac.jp/en/recruitment/index.html> )

◆Life Science Course (5-year curriculum)

In the first and second years, students will learn basic and advanced genome editing techniques. From the third year, they will conduct research utilizing the knowledge they have acquired. Through basic courses on social implementation of technologies and internships, they will be trained to become experts able to work at the cutting edge of genome editing technology.

\*A student of this program is required to satisfy the requirements of both his/her major in the graduate school and this program simultaneously.

◆Economic assistances

We currently provide students of the program with financial supports mentioned in (1), (2), and (3) below.

- (1) 50,000 yen per month (600,000 yen per year) will be provided for up to three students per year to students who are recognized as displaying excellent academic performance and having outstanding achievements in academic activities after enrolling, beginning the following year after enrolment in the program. (Details of the application procedure will be announced after admission.)
- (2) Free tuition will be provided for third and later years of the Life Science Course and all years of the Medical Course. (Some students may be ineligible due to their academic performance.)
- (3) Ikenoue Student Dormitory is available for 2 years at a fee after enrolment in the program.

\*The above details regarding financial support in (1), (2), and (3) are as of April 1, 2020 and are subject to change.

\*The support is provided only within the standard course term.

准教授 Associate Professor	石原 康宏 Yasuhiro ISHIHARA	グリア細胞に着目した神経薬理学・神経毒性学研究: 化学物質(環境化学物質やPM2.5など)曝露による神経系疾患の修飾と不飽和脂肪酸(DHA)の障害抑制効果 Neuropharmacology and neurotoxicology on glial cells: Modulation of neurological disorders by chemical exposure (i.e. environmental chemicals and PM2.5) and neuroprotective action of unsaturated fatty acid such as DHA.	グリア細胞, 有害化学物質, 神経保護 Glia, Harmful chemicals, Neuroprotection	生命環境総合科学プログラム Program of Life and Environmental Sciences
准教授 Associate Professor	上野 勝 Masaru UENO	真核生物のテロメア維持機構・DNA修復機構の解明と、その抗老化・抗癌関連医薬品への応用研究 Study on molecular mechanisms of telomere maintenance and DNA repair and their applications for development of anti-cancer and anti-ageing agents.	テロメア, がん, 老化 Telomere, Cancer, Aging	生物工学プログラム Program of Biotechnology
准教授 Associate Professor	久米 一規 Kazunori KUME	細胞の機能を保証する細胞構造(オルガネラや細胞極性など)の制御機構に関する研究 Study on the control mechanisms of cell structure (organelles and cell polarity etc.) which ensures cellular functions.	細胞構造, オルガネラ, 細胞極性 Cell structure, Organelle, Cell polarity	生物工学プログラム Program of Biotechnology
准教授 Associate Professor	坂本 尚昭 Naoki SAKAMOTO	ウニの発生をモデルとして、形態形成遺伝子の転写制御, 発生過程における遺伝子・クロマチン・染色体の動態, インスレーターの作用機構について研究 Research for transcriptional regulation of morphogenetic genes, nuclear dynamics of gene, chromatin and chromosome during development, and mechanism of insulator activity, using the sea urchin development as a model.	ウニの発生, 転写, 核内動態 Sea urchin development, Transcription, Nuclear dynamics	数理生命科学プログラム Program of Mathematical and Life Sciences
准教授 Associate Professor	佐久間 哲史 Tetsushi SAKUMA	哺乳動物培養細胞を用いたゲノム編集の新規技術開発, ゲノム編集を応用した人工転写調節ならびにエピゲノム編集技術の開発と応用 Development of new technology of genome editing using mammalian cultured cells; Development and application of artificial transcriptional control and epigenome editing systems repurposed from genome editing.	ゲノム編集, エピゲノム編集, システムゲノム科学 Genome editing, Epigenome editing, Systems genomics	数理生命科学プログラム Program of Mathematical and Life Sciences
准教授 Associate Professor	富樫 祐一 Yuichi TOGASHI	計算生物学: 主として生体内の分子動態や情報処理機構などを対象とした計算科学的研究 分子シミュレーション, 画像データ解析など Computational Biology: e.g. molecular dynamics simulation and bio-imaging data analysis, to elucidate the mechanisms of information processing in living systems.	数理モデル, 分子動力学, インシリコ創薬 Mathematical model, Molecular dynamics, In silico medicine	数理生命科学プログラム Program of Mathematical and Life Sciences
准教授 Associate Professor	濱生 こずえ Kozue HAMAO	動物細胞の細胞骨格制御と細胞分裂の分子機構に関する研究 Molecular mechanisms of cytoskeletal regulation and cell division in animal cells.	細胞骨格, 細胞分裂, 細胞質分裂 Cytoskeleton, Mitosis, Cytokinesis	基礎生物学プログラム Program of Basic Biology
准教授 Associate Professor	吉田 将之 Masayuki YOSHIDA	こころの生物学的基盤に関する研究 Biological basis of emotion, learning, and mind in animals.	動物心理, 情動, 神経科学 Animal psychology, Emotion, Neuroscience	生物資源科学プログラム Program of Bioresource Science
特任准教授 Associate Professor (Sp.Appt.)	杉 拓磨 Takuma SUGI	個と集団の行動を支配する物理則の研究, 神経ネットワーク老化機構の研究 Behavioral systems biology and neural network aging.	行動, 神経ネットワーク老化, 光計測技術開発, Behavior, Imaging, Neural network aging	数理生命科学プログラム Program of Mathematical and Life Sciences

担当教員 Academic Staff		研究内容 Research Fields	キーワード Keywords	所属プログラム Program
講師 Lecturer	落合 博 Hiroshi Ochiai	多能性幹細胞における細胞間遺伝子発現量多様性出現の分子機構の研究 Molecular mechanisms of cell-to-cell heterogeneity in gene expression in pluripotent stem cells.	多能性幹細胞, ライブイメージング, 転写 Pluripotent stem cells, Live imaging, Transcription	数理生命科学プログラム Program of Mathematical and Life Sciences
助教 Assistant	大黒 亜美 Ami OGURO	脳における不飽和脂肪酸(アラキドン酸やDHA等)の代謝と生理作用の研究, 細胞のストレス(低酸素や酸化ストレス)に対する応答機構の研究 Study on the metabolism and physiological functions of unsaturated fatty acids (Arachidonic acid and DHA etc.) on brain. Molecular mechanism of cellular responses to hypoxia or oxidatives tress.	不飽和脂肪酸, ストレス応答 Unsaturated fatty acid, Cellular stress response	生命環境総合科学プログラム Program of Life and Environmental Sciences
助教 Assistant	津田 雅貴 Masataka TSUDA	放射線や抗がん剤が引き起こすDNA損傷および修復機構 DNA damage induced by radiation and anti-cancer agent and repair mechanisms.	放射線, 抗がん剤, DNA損傷, DNA修復 Radiation, Anti-cancer agent, DNA damage, DNA repair	数理生命科学プログラム Program of Mathematical and Life Sciences
助教 Assistant	湯川 格史 Masashi YUKAWA	ゲノムの安定性保持に必須な微小管形成機構に関する研究と有用生理活性物質の開発 Our research focuses on the molecular mechanisms to establish and maintain a bipolar spindle structure, which is essential for proper chromosome segregation. We also aim to implement our findings towards the development of novel drugs and therapeutic technologies by which to build and sustain healthy aging society.	細胞周期, 染色体分配, 細胞骨格 Cell cycle, Chromosome segregation, Cytoskeleton	生物工学プログラム Program of Biotechnology
