From data to research writing

Conducting and presenting data analysis for scholarly audiences

Participants:
Social science researchers of Hiroshima Univ.
 *Graduate students are welcome.
This is a faculty development program.

Date & Venue

Higashi-hiroshima Campus

2:30 pm – 4:30 pm
Monday, November 28, 2022
Library Hall at the Central Library

One of the biggest challenges in writing for peer-reviewed publications, especially in the social sciences, is representing research in a way that is clear for audiences to understand. This seminar will focus on qualitative data analysis and its role in the research writing process in the social sciences. The seminar will explore useful practices for producing meaningful visualizations through data analysis for the purposes of research writing. It is hoped that the insights shared in this seminar will empower writers of research to better represent their data to scholarly audiences and ensure publication in peer-reviewed publications.

Instructor

Roehl Sybing

Roehl Sybing is an Assistant Professor at Doshisha University and a Senior Trainer at ATLAS.ti. He was previously a Writing Advisor Fellow at the Hiroshima University Writing Center from 2019-2020. His current research interests include qualitative research methodology, dialogic classroom interaction, and higher education policy.
