

# Cancer Cell

## Meet the Editor Publishing with Cancer Cell

Cancer Cell provides a high-profile forum to promote major advances in cancer research and oncology. The primary criterion for considering manuscripts is whether the studies provide major advances into answering important questions relevant to naturally occurring cancers. Cancer Cell particularly welcomes translational research.

Montse Rojo de la Vega - Scientific editor  
Cambridge, MA, USA

Montse Rojo de la Vega obtained her B.Sc. in Biology from Mexico's National Autonomous University (UNAM), where her passion for cancer research started. She then obtained an M.S. in Molecular Oncology from the Spanish National Cancer Research Centre (CNIO) and a Ph.D. in Cancer Biology from the University of Arizona, where she studied the anti- and pro-tumorigenic roles of NRF2 in cancer. Montse joined Cancer Cell in 2018.
