Message from the Dean

Hiroshi Sekiya Dean, School of Integrated Arts and Sciences

Established in 1974, the School of Integrated Arts and Sciences endeavors to identify and solve the various problems of individuals and societies through a fusion of humanities and sciences, going beyond the boundaries of academic disciplines.

Multidisciplinary education, in which various disciplines are studied while having a core discipline, and interdisciplinary study, in which the knowledge and methodologies of multiple disciplines are integrated, develop competent generalists. That is to say, the School strives to produce specialists who can utilize overlooking and multifaceted viewpoints to solve important world problems.

I truly hope you can broaden the possibilities for yourself in our school.

Message from the IGS Department Head

Toshihiro Yamada IGS Department Head

What skills are needed for being active globally? Do you think only English skills are enough?

I think the most important skill is the ability to logically elaborate your thoughts to others with different thoughts and cultural backgrounds while at the same time sincerely respecting them. IGS assembles students from all over the world and takes advantage of this to help you develop the knowledge and communication skills that are needed to be active globally. Why don't you join us at IGS?

Guiding Principles of Hiroshima University

Based on its founding principle "a single unified university, free and pursuing peace" and its five guiding principles, Hiroshima University fulfills its roles as a national university.

The Pursuit of Peace

To develop intellectual attitudes which always seek peaceful solutions to the problems affecting society and the world at large.

The Creation of New Forms of Knowledge

To evolve new systems of study which surpass existing frontiers of knowledge and encourage intellectual innovation.

The Nurturing of Well-Rounded Human Beings

To train graduates with well-developed and multifaceted personalities by means of an education which has breadth as well as depth.

Collaboration with the Local, Regional, and International Community

To create a university with a strong international awareness which can efficiently disseminate knowledge on a worldwide scale, in collaboration with local and regional communities.

Continuous Self-Development

To maintain a constant readiness to re-examine established ways of acting, and a constant openness to improvement and innovation.

Study Integrated Arts and Sciences in Hiroshima, Japan

Students from all over the globe will learn together. They will develop intercultural communication competence, broad-mindedness, cooperative skills to bring more peace to the world.

Department Welcomes:

- (1) Students who would like to understand global issues with an integrative perspective to pursue world peace while respecting linguistic, cultural, and religious differences;
- (2) Students who are interested in natural sciences and would like to work towards the harmonious relationship between people and nature; and
- (3) Students who are willing to improve language skills and make a contribution to a global society.

S 5 Fast Facts about Integrated Global Studies

- 1. Full-time 4-year undergraduate program taught in English.
- 2. Language competence: Students will be competent in English and Japanese.
- 3. Interdisciplinary arts and sciences education: Students will have a wider perspective when solving problems related global issues in society.
- 4. Integrative perspectives and cooperative skills: Students will be able to think beyond nationality, region, religion, culture, and language.
- 5. Careers after graduation: Students will be ready to work in Japan or abroad, or pursue academic careers at graduate schools.

Degree Awarded:

Bachelor of Arts and Sciences

Number of Students:

40 per year

AY 2023 Academic Calender:

OSpring Somostor (Apr 1 Sont 30)

	Japining aemiester (Apr. 1 – aep	1.30)

Educational Program

The IGS Department provides a liberal arts curriculum to develop a diverse approach to exploring and solving current global issues by utilizing an integrative perspective incorporating humanities, social sciences, and natural sciences. Consequently, knowledge and skills learnt through the curriculum should guide students to the exploration of and possible solutions to issues that modern society is currently facing around the globe.

1st year	^{2nd} year	· 3 rd year	4 th year
Basic courses in university education Language education Liberal Arts education	Multidisciplinary subjects IGS core subjects IGS subjects from th - Culture and tourism - Peace and communi - Environment and so	ree fields	Graduation thesis
(Short-term study abroad)		Project-type problem solving research Global internship	

- (1) Language education:
 - All courses are conducted in English.
 - Those whose first language (L1) is Japanese are required to attend a study abroad program in the second year.
 - Students whose first language (L1) is not Japanese will study Japanese intensively.
 - Students are encouraged to learn a third or fourth foreign language.
- (2) Tailor-made curriculum: students create their own individual curriculum guided by their tutors.
- (3) Multidisciplinary subjects to acquire the knowledge and methodology that provide a foundation for the possible solutions to social and environmental issues.
- (4) Courses to improve debate and presentation skills in both English and Japanese.
- (5) Curricula focused on culture and tourism, peace and communication, and environment and society.
- (6) Global internship for 3rd-year students in private companies, public organizations, nonprofit organizations, and research and educational institutions in and outside of Japan.
- (7) Project-type problem solving research and graduation thesis.

You can Learn Science in IGS!

Are you willing to learn how to create more effective ways to use our limited resources and energy? Are you keen to make a contribution to solve the current environmental problems? We will pursue these important goals by ensuring that our students obtain a comprehensive and integrated education in natural sciences, social sciences, and intercultural communication.

To support our objectives, IGS has a number of Professors in Physics (Physics of Complex Systems, Soft Matter Physics), Chemistry (Colloid and Interface Science, Biogeochemistry), and Biology (Conservation

Biology). These Professors are involved in a variety of State of the Art research projects for the purpose of creating a sustainable, environment-friendly world.

In IGS, you will be trained to have a wide perspective necessary for investigating scientific problems while conducting scientific research in an integrated manner.

This will be accomplished by obtaining specialized knowledge from a number of different academic areas and through developing strong interpersonal communication skills which are needed to advance a peaceful integrated global society.

Core Subjects from Three Fields

Culture and Tourism

Is globalization destroying regional culture? How will people's sense of place change among increasing migration and movement? Tourism is credited for improving intercultural understanding and contributing to the preservation of nature and culture. However, isn't there a danger of destroying the environment and turning culture into a mere spectacle? To tackle these questions, we will nurture the ability to discuss the relations between people and culture in a global society, between tourism and local communities, between thought and culture, and between Japanese culture and the world.

Courtesy of Hiroshima Prefecture

Study Plan 1 If you want to contribute to regional and cultural development through tourism, you are encouraged to take:

- Tourism Studies in order to learn the basics of tourism from different angles;
- Japanese Tourism and Contemporary Issues in International Tourism in order to discover the effects and problems of tourism; and
- Japanese Popular Arts and Culture and anthropology subjects in order to think about the relationship between culture and

Finally, consider ways tourism can contribute to regional development through fieldwork and your thesis to prepare you for a career in cultural organizations, tourism industries or in civil service.

Peace and Communication

Do we all equally receive benefits from globalization? Could it be that, as the society is globalizing, the differences in world views and values, and the conflicts relevant to economic profits and political predominance will increase? We need to overcome such issues with the collective wisdom of the human race and mutual understanding in order to establish world peace. In IGS, you will explore background causes underlying such conflicts and appreciate differences among diversified culture and language groups. Such skills are necessary in order for us to live in a peaceful and harmonious society.

Study Plan 2 If you are interested in conflict resolution from a multi-cultural perspective, you are encouraged to take:

- Peace and Conflict Research and Ethics Killing and Violence in order to obtain background knowledge concerning military conflicts especially in Asia, Middle East, and Africa; and
- Cultural Psychology, and Language and Thought in order to be aware that other have distinct world views and values as well as cultural and linguistic diversity.

Possible future career opportunities include becoming an international civil servant, a diplomatic official or other positions at internationally- deployed private enterprises including travel industries and media.

Environment and Society

The world population is expected to grow to 10 billion by the end of the 21st century, which will aggravate the shortage of natural resources. Therefore, we must intensify our efforts to develop human- and environment-friendly technology that can promote a civilized and comfortable life for all mankind and protect our natural environment. In IGS, you can major in science while studying global environmental issues.

Study Plan 3

If you are interested in working as a environment-friendly scientist or engineer, you are encouraged to take the following courses:

- Experimental Methods and Laboratory Work in Science for IGS as well as basic subjects in science in order to gain solid knowledge required in scientific research;
- Topics in History of Science, Studies on Japanese Companies and Social Entrepreneurship, and Cross-cultural Negotiation; and Graduation Thesis in a scientific field to get trained as a scientist or an engineer.

These courses should widen your perspective on the Environment and Society and help you grow as a global-minded scientist.

Faculty (April 1. 2023)

Yamada Toshihiro

Position Professor

Research Area Conservation biology, Forest ecology

Research Topic We can see a great diversity of living organisms (biodiversity) on the earth. I am intrigued by the questions how and why the earth has such a

tremendous biodiversity. On the other hand, this great biodiversity is rapidly being lost by anthropogenic impacts. I would like to contribute to building an international framework in order to conserve our current biodiversity.

Message What knowledge do we need to conserve the biodiversity of our planet? Of course, ecology is essential to the accomplishment of this goal. In addition, we have to be knowledgeable of a number of fields including ethics, economics, sociology, and jurisprudence. You can learn all these essential subjects in our IGS Department so you can act on biodiversity conservation. IGS is the best place to learn and practice the conservation of biodiversity!

Villeneuve Masumi

Position Professor

Research Area Colloid and Interface Science

Research Topic My specialized area of research involves interface science. An interface is an extremely thin layer of a few molecules thick that only exists between two adjacent phases, nevertheless it is one of the most

dominant factors comprising of various phenomena in nature such as the generation of clouds, material transport across cell membranes, sticky gecko feet, and the nature of soil colloids. It also affects stability of entire systems. I have been fascinated by these intriguing however invisible interfacial regions and now investigate this area of research through thermodynamics.

Message Environmental issues are generally made up of various complex factors. For those who are ambitious to confront such complexities, basic academic knowledge and skills are essential. Let us help you develop as a scientist or engineer who can relate your specialized area of interest to the surrounding fields and work with people of different research backgrounds.

Position Professor

Research Area Peacebuilding

Research Topic Armed conflicts harm people, things and society. My research is about how to overcome the damage from a battle and build a peaceful society.

Currently I am involved in a number of research projects and their themes include human rights-based peacebuilding, peacebuilding through business, second chance of education (after an interruption to schooling due to an armed conflict), security governance and migration.

Message In the era of globalization, we share various challenges beyond borders. Peace is one of them. It is not given, but requires our constant effort to preserve it. You can join network-building for peace through your studies of peacebuilding and multi-cultural communication here at Hiroshima University.

Kaneko Shinji

Research Area Environmental Economics and Policy Studies, Development Policy Studies

resources and energy in view of public policy are broadly studied, mainly in developing countries. The major approach used in this area of research is based on empirical data collection through field investigations.

Position Professor

Research Topic The relationship between economic development and the natural environment including

Message I like energetic people with lots of curiosity who always try to balance play, study, and work.

Shibata Miki

Position Professor

Research Area Second language acquisition

Research Topic Do you think that any foreign language has not improved as fast and as much as it should have? We use our native language in our daily lives without any

problems, despite the fact that we have never made any effort to acquire it. Why doesn't foreign language proficiency advance in proportion to our efforts? I have been working on this puzzle for my research theme.

Message Learning is exploring plausible reasoning for 'Why?', but not finding a correct answer for it. Considering previous studies, you further investigate, think, and come to your own conclusion. Such a process is the essence of learning. Why don't you pursue your academic interests within IGS?

Seki Koki

Position Professor

Research Area Cultural Anthropology, Area Studies of Southeast Asia

Research Topic My research deals with various aspects of contemporary globalization and development focusing

particularly on the Philippines. Current researches are on social policy, civil society and welfare state as a modern institution of governmentality, and how these influence people's mode of life and identity. Specific topics are: urban poverty, land tenure security and social housing projects in slum communities, natural resource management and political ecology in rural communities, and transnational migration.

Message If you are interested in exploring contemporary society and culture of Japan, Asia, and beyond by experiencing fieldwork in a local community, then IGS can be the best place for you!

Carolin Funck

Position Professor

Research Area Tourism Geography

Research Topic My research focuses on sustainable tourism development. For example, I am investigating what kind of merits and problems the recent rapid

increase in international tourists in Japan creates for destinations. I am also looking into possibilities for local communities to promote tourism based on their culture and resources rather than "being developed" from outside.

Message I myself came to Japan as an exchange student many years ago. In the place I lived, I experienced how interesting intercultural exchange can be and how important language is for us. Tourism, my object of research, also is an activity that draws pleasure from the encounters between people and cultures. I hope that IGS will become a place for many encounters and a starting point for new discoveries.

Amano Shuichi

Position Associate Professor

Research Area Applied linguistics, Phonetics

Research Topic My research background is in applied linguistics and phonetics. I am particularly interested in implicit learning of lexical stress patterns in English as a

foreign language. I am also interested in the other fields of language teaching such as writing and pronunciation.

Message I wish you an excellent academic experience at Hiroshima University. Enjoy the diversity at IGS! I look forward to meeting you.

Iwamoto Yoko

Position Associate Professor

Research Area Atmospheric Chemistry, Chemical Oceanography
Research Topic | am studying tiny particles (aerosol)

suspended in the atmosphere. Aerosol can act as nucleus of cloud particle. In other words, clouds and raindrop

cannot be formed without aerosol. In order to grasp the role of aerosol in climate change and biogeochemical cycles, I am measuring physical and chemical characteristics of aerosol in various places such as ocean, mountains, urban, rural site and so on.

Message In order to deal with global environmental problems, it is important to highly appreciate your expertise and to have an interdisciplinary / international perspective. I am happy if I can conduct field observations with the students who gained broad perspective and high communication skills at IGS in the future.

Kakee Tomoko

Position Associate Professor

Research Area Conflict Resolution, International Law

Research Topic | am interested in international conflicts on historical issues and post-war compensation. My research has covered various international law topics

such as the UN and the use of force, environmental rules for deepsea mining. I am researching ways for conflict resolution and conflict transformation through legal and nonlegal approaches using Nonviolent Communication (NVC).

Message Conflicts, from international to personal ones, can provide opportunities to learn various things. I hope, through the conflict resolution study, we can recognise our bias and habit of interpretation and discuss elements necessary for resolving conflicts.

Kawamoto Naoe

Position Associate Professor

Research Area Social welfare and education for international students

Research Topic I am researching welfare issues related to children and elders who are foreign minorities in Japan

and Japanese nationals whose origin is from outside of Japan. I have also been conducting research on welfare and long-term care of war-displaced Japanese returning from China. In addition, I investigate how students acquire academic skills from the viewpoint of different learning environments.

Message I am very happy to teach students with diverse cultural differences in IGS. I hope to discuss these cultural similarities and differences in our classes. I believe learning and discussing differences is the first step to mutual understanding. Let's enjoy our experiences together!

Maria Mihaela Grajdian

Position Associate Professor

Research Area Media Studies, Cultural Anthropology

Research Topic In my research, I am focusing on the ambivalent interaction between media and its messages in phenomena of mass entertainment, such as Takarazuka

Revue or Studio Ghibli, and more recently, Shinkai Makoto or Murakami Haruki. At the core of my scientific endeavors, the human being as both producer and consumer of socio-cultural merchandises is located, beyond economic-political compulsions and limitations.

Message I am driven, privately and professionally, by a firm faith in the human being's ability to serve the world with kindness. Furthermore, Mahatma Gandhi's words decades ago "Become the change you want to see in the world" are a permanent reminder of my duty to do my best, and to inspire those around me to do their best, as well. Let's do our best together!

Jang Kyungjae

Position Associate Professor

Research Area Tourism Studies, Contents Tourism

Research Topic Why do people travel? My research focuses on tourism induced by popular culture, called "contents tourism." Contents tourism is a travel behavior

motivated fully or partially by elements of popular culture forms, including film, television dramas, manga, anime, and novels. I am examining why people are visiting popular culture related places, and how destinations obtain the authenticity by contents tourism.

Message Life is all about chances and opportunities, but "opportunity seldom knocks twice". I am sure that IGS provides excellent opportunities to broaden your multicultural horizon, expand your knowledge, and discover new things.

Shirakawa Toshiyuki

Position Associate Professor

Research Area Research of Social Stratification, Sociology of Education, Social Research/Survey Methods

Research Topic The study of social inequality focuses on the fact that people are divided into several stratum according to their education and income. Regarding

occupation, it is also possible to assess whether it is high or low once you have determined the rule. The position that is supposed to be high is limited in number and not everyone can reach there. I investigate the influences of gender and parents' status on people's educational decision making or occupational choice by using statistical analysis. Parents' education correlate highly with their offsprings' university entrance rate. Despite the increase in women in tertiary education, men and women are still concentrated in different study programmes. To clarify the social mechanism creating such a difference is my research motivation.

Message Studying at university often does not give simple answers, but here is also interesting point. I would like us to explore the various unsolved problems together.

Tanaka Shinpei

Position Associate Professor

Research Area Physics of Complex Systems

Research Topic I study complex systems where many elements interact with each other. Even if each element is simple, their behaviors as a whole can be very complex.

Moreover, the system sometimes determines the behaviors of its elements. Thus, the elements and the system are in an interwound relationship. I conduct both experiments and computer simulations to tackle this complex relation.

Message Anything can be the target of physics. Physics is an attempt to understand the general mechanisms of everything from materials to living things, natural environments, human societies, or even the Internet. There, the elements and the system are mutually and complexly entangled. We welcome anybody who has a keen mind and a broad interest in any complex phenomena.

Robert H. Taferner

Position Associate Professor

Research Area Applied Linguistics, Second Language Acquisition, Pragmatics

Research Topic My main research areas include Psycholinguistics and Pragmatics. Within the area of Psycholinguistics I am interested in second language learning through investigating bilingualism,

cognition, and crosslinguistic influences. In particular, I am currently developing a Crosslinguistic Image Schema Differential (CISD) hypothesis that tries to address the difficulties learners have in acquiring spatial and temporal adpositions (e.g., prepositions and particles). I have also been interested in Pragmatics (Language in Use) since the beginning of my teaching career. Currently, I am contributing to research on intercultural sensitivity development in order to help international students acculturate to their new learning environments. Furthermore, I am addressing English as a Lingua Franca as part of my investigation of Workplace Pragmatics within our IGS Internship Program.

Message I came to Japan to practice martial arts and learn about Japanese culture. Through studying Japanese, I began to understand the difficulties in learning and acquiring a new language. With this in mind, I hope I can help you brighten your future as part of the IGS community.

Nishi Makoto

Position Associate Professor

Research Area Cultural Anthropology, Medical Anthropology, Global Health

Research Topic My research focuses on how illness experiences of people in different parts of the world are shaped by socio-cultural factors including gender, power, and violence.

Message While health is a universal human concern, how certain illness is experienced by people can be strikingly different. Thus, exploring the issues concerning health and illness is to think about the commonalities and differences of the peoples around the world.

Hosaka Tetsuro

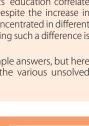

Position Associate Professor

Research Area Ecology, Entomology, Human-nature interaction

Research Topic I have been woking on the diversity and role of insects in various ecosystems from tropical forests

to urban settings. I am also interested in the interactions between human and nature, such as nature-based tourism, children's nature play and conflicts with wildlife, from the perspective of ecosystem conservation.

Message Fascination of studying is to make our world view broader or totally new by understanding things deeper. I look forward to seeing students who are full of curiosity.

Machida Akira

Position Associate Professor

Research Area Cognitive Linguistics

Research Topic My research interest is the relationship between language and thought. Especially, I focus on how general cognitive abilities can shape human

language capacity and in what way living with a language has some influence on its user's mind. The difference between Japanese speakers' way of thinking and that of English speakers' is one of my current research topics.

Message It has been estimated that there are about 7,000 languages in the world. Assuming that language and thought are strongly connected with each other, we may have almost 7,000 different ways of thinking. Join us in our study of the human mind through the study of language!

Yamane Tatsuo

Position Associate Professor

Research Area International Relations

Research Topic My research is concerned with how contemporary armed conflicts occur and how international society provides approaches for conflict

resolution and peacebuilding to respond to those conflicts. From the academic field of International Relations, I am examining the challenges of peace and conflict, such as the causes of conflicts related to state failure, and the possibilities and limitations of liberal peacebuilding.

Message Why don't you make the choice to enter IGS to become a person who can profoundly speak about a number of important topics through your first language as well as foreign languages.

Curtis Andrew Rigsby

Position Associate Professor

Research Area Japanese Religion and Culture, Philosophy, Comparative Thought

Research Topic My research focuses on Japanese philosophy, especially modern developments such as the Kyoto School surrounding Kitarō Nishida. In particular, I have

examined Japanese theories of ultimate explanation, such as the character of divinity, including practical ramifications. Correspondingly, I examine dialogue between traditions and the potential contributions they can make to solving real problems in contemporary life.

Message What are the foundations of reality? What is beauty and value? How should we live? Why do people see the world differently and why do people form different ways of living? Are there commonalities between different cultures and religions? Are differences between people impediments or strengths? My own efforts struggling with these questions are at the core of why I think university experience is so precious, and are also a primary reason why I have studied Japan.

Watanabe Chiho

Position Assistant Professor

Research Area Soft Matter Science, Biophysical Chemistry

Research Topic Our body is composed of many cells. Cells are composed of many molecules which often called biomolecules. From experiments using artificial cells made of such molecules, I aim to understand complex biological phenomena from simplified systems.

Message I hope that you will enjoy your time as a university student to the fullest and cultivate the strength to live through various experiences, even in the current global difficulties.

1. Date of Admission: April 2024

2. Candidate Selection System

	Selection System	Number of Students to be Admitted	Main Target	Time Period
А	Overseas Entrance Interview Examination for International Applicants in July	A few	International applicants who take the on-site examination within their own country	Application: June Document Screening: July Interview Examination: July
В	Overseas Entrance Interview Examination for International and Japanese Applicants in November	10	Applicants of all nationalities who take the on-site examination within their own country	Result Notification: August Application: October Document Screening: October Interview Examination: November Result Notification: December
С	On Campus Entrance Interview Examination for International and Japanese Applicants in November	10	Applicants of all nationalities who take the examination in Hiroshima	Application: October Document Screening: October Interview Examination: November Result Notification: December
D	On Campus Entrance Interview Examination for International Applicants in February	A few	International applicants who take the examination in Hiroshima	Application: December-January Document Screening: January Interview Examination: February Result Notification: March

Note: In the selection system C and D, applicants are required to take their interview in English at the Hiroshima University Higashi-Hiroshima campus. In the selection system A and B, applicants are not required to come to Japan for their interview. The applicants are requested to take the online interview in English.

3. English Proficiency Requirements

Applicants must submit any one of the following English proficiency certificates as an application requirement.

English Duofision ou Tost	Application Requirements		
English Proficiency Test	Selection System A, B and D	Selection System C	
1) Cambridge English ※ 1	160 or above in overall score	140 or above in overall score	
2) EIKEN	A passing Pre-1 st grade or above	A passing 2 nd grade or above	
3) GTEC (CBT Type only)	1180 or above	930 or above	
4) IELTS™ (Academic Module)	5.5 or above	4.0 or above	
5) TEAP (4 skills)	309 or above	225 or above	
6) TEAP CBT (4 skills)	600 or above	420 or above	
7) TOEFL iBT®	72 or above	42 or above	
8) TOEIC® L&R and TOEIC® S&W This score is determined by multiplying your S&W score by 2.5 and adding your L&R score	1560 or above	1150 or above	

 $Note: Applicants\ who\ satisfy\ either\ one\ of\ the\ following\ two\ requirements\ are\ not\ required\ to\ submit\ the\ above-mentioned\ English\ proficiency\ certificates.$

⁽¹⁾ Applicants who have undertaken three years or more of their secondary education (Senior high school, Junior high school, etc.) in English as their primary language of instruction.

⁽²⁾ Applicants who are taking or have taken the International Baccalaureate Diploma with English as the language of instruction.

^{**1} Only "Schools" and "General and higher education" modules are accepted. For more details, please see the application guide.

Scholarship for IGS International Students

We offer full or partial scholarship opportunities to international students enrolled in IGS bachelor's program to help student succeed academically. Prospective students may apply for these scholarship programs through the IGS Office.

These scholarship programs are offered to students who do not have a Japanese nationality and will enter Japan with a valid "Ryugaku" student visa. The scholarships listed below are not available for those who already live or study in Japan as an international student. Updated information should be obtained from IGS website and emails from the IGS office. Please note that successful applicants will have to withdraw from other scholarship programs to study in Japan if any.

1. Japanese Government (MEXT*) Scholarship (University Recommendation)

*Ministry of Education, Culture, Sports, Science and Technology

Туре	Government (MEXT)
Award	- Monthly allowance of 117,000 yen - Full waiver of all school fees - Air ticket to and from Japan
Term	Four years
Eligibility	 Not having Japanese nationality and not living/studying in Japan Success in IGS admissions for April 2024 intake High academic performance in the previous education institution Under 24 years old at the time of enrollment
Application December - candidates will be contacted by IGS office.	
Decision	March

2. Reservation Program for Monbukagakusho Honors Scholarship for Privately-Financed International Students by Pre-arrival Admission (University Recommendation)

Type	Government (MEXT/JASSO)	
Award	Monthly allowance of 48,000 yen	
Term	One year	
Eligibility	 Not having Japanese nationality and not living/studying in Japan Success in IGS admissions for April 2024 intake High academic performance in the previous education institution 	
Application Candidates will be contacted by IGS Office in March		
Decision	April	

Please note that the information above applies only to the new students of April 2024 intake and that the available scholarship opportunities for students enrolled in and after 2025 are subject to change.

Required Enrollment Expenses (as of April 2023)

Undergraduate students must pay the following application, enrollment, and tuition fees:

Application Fee	Enrollment Fee	Tuition Fee
¥17,000	¥282,000	¥535,800 (per year)

(If tuition is revised while you are a student, you will pay the new tuition rate after the revision.)

Living Expenses in Higashi-Hiroshima

The average monthly living expenses for international students, excluding school fees, is approximately ¥82,000. Note that living expenses in the area around Hiroshima University are cheaper than metropolitan areas. (The national average is ¥93,000.)

Careers after Graduation

After your graduation, you have various career options available to you, depending on the focus of your studies. If you study mainly humanities and social sciences subjects, you may be able to pursue a career in the tourism industry, mass media, a non-governmental organization, a consulting firm, a think tank, etc. If you study mainly natural science subjects, you may be able to pursue a career as a scientist, an engineer, a designer, or even an entrepreneur. Another option is to continue your studies in Japan or overseas in graduate school.

About 45% of our first and second graduates got a position in private companies including Fujitsu Limited, Honda Motor Co., Ltd, Japan Airlines Co., Ltd, Konami Digital Entertainment Co., Ltd, Mazda Motor Corporation, Otsuka Pharmaceutical co., Ltd and Rakuten Group, Inc. About 10% of students became civil servants in Japan and home countries. About 30% of graduates went on to graduate schools. (As of March 2023)

Campus Life

A Friendly and Supportive Environment

Our campus is full of greenery where you can enjoy vibrant student activities and also get involved in local Japanese life. Students will meet each other through the freshmen orientation in April. This should be a great opportunity to make new friends. Various support for your studies and lifestyle are available. In addition, there are many events and activities on campus such as the *Yukata* Festival (people wear a special summertime *kimono* during this festival). Students can make their campus life more enjoyable by participating in such social activities.

Accommodations

All successful applicants will be eligible to stay in the Ikenoue Student Dormitory for their first two years of study.

Ikenoue Student Dormitory (Higashi-Hiroshima City, Kagamiyama 2-812-62)

Ikenoue was founded for the dual purpose of providing appropriate housing to students and giving students the chance to experience student life as a responsible adult. To promote mutual understanding and international

exchange, accommodations in the dormitory are offered to both Japanese and international students. Rent ranges from ¥4,700 to ¥15,000 per month, depending on the room type.

From students' third year, there will be help available when they move to private apartments. Most apartments include a kitchen, bath, and bathroom, and rent ranges from ¥20,000 to ¥50,000 per month, depending on the size of the apartment. The co-op shop on campus is also a good place to search for an apartment.

Campus Location

Hiroshima University is situated in Higashi-Hiroshima City, a regional hub about 30 minutes by train from Hiroshima City. The area surrounding the campus is a beautiful natural area that has long been famous for the brewing of sake, Japanese rice wine. Saijo, the area in which Hiroshima University is located, has all the big city amenities while keeping its rural appeal. Every October, Saijo holds the Sake Matsuri, an energetic festival celebrating the area's long history of sake brewing. Higashi-Hiroshima City and Saijo provide a beautiful place to study while catering to all the needs of university students.
