

JOINT SYMPOSIUM FOR PROMOTING FEMALE RESEARCHERS

Network with
Women Researchers in the
Chugoku-Shikoku Area!

Several world-class research projects are currently running in the Chugoku-Shikoku area of Japan. These projects aim to advance leading-edge sciences, but they also focus on the career development of female researchers to prompt female undergraduate and graduate students to become next-generation leading scientists.

The Joint Symposium for Promoting Female Researchers will provide a platform for female students to meet established leading women researchers. You will find role models and friends who are working towards similar goals. We encourage students to attend the symposium in person & to give a 3-minute lightning presentation about their work. We will support their travel expenses to Hiroshima University to promote the circulation of attendees. The official language of the event is English.
