Master's Course

(April 2024 Admissions)

November 2023

Hiroshima University

Admissions Policy <Master's Course>

The Graduate School of Integrated Sciences for Life, based on its Diploma Policy and Curriculum Policy, expects to admit master's students as described below.

Students who:

1. Have strong eagerness to learn, who wish to acquire deep expertise and understanding in a wide range of fields from the basics to applications that include medical treatment in the areas of study related to biology and life sciences, and who have basic academic knowledge for that purpose;
2. Wish to acquire interdisciplinary problem-searching and problem-solving abilities, which can integrate and link different fields, along with broad general education, without being constrained by conventional frameworks of research fields, and to create "science that can guide sustainable development"; and
3. Are aware of both academic fields and the real world, and who wish to acquire international and interdisciplinary communication skills as well as practical capabilities in society.

In order to admit such individuals, this Graduate School selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

1. Type of Students We Seek

[Program of Biotechnology]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have acquired an education at the level of completing an undergraduate of university course and basic knowledge in biological sciences and bioengineering as their special field of study;
2. Have a high level of interest in the bioengineering field, as well as the ambition and strong will to carry out research to its end;
3. Have a logical thinking ability and communication skills to verbally express their logical thinking;
4. Have acquired a command of English at the level of completing an undergraduate of university course or higher; and
5. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Food and AgriLife Science]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a high level of interest in theories and methods of understanding and utilizing foods and biological functions from the perspective of molecules and cells;
2. Have a high interest in finding and solving problems from a scientific perspective regarding creatures' diverse functions and the advanced use of food resources;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
4. Have acquired abilities at the level of completing an undergraduate of university course or higher regarding the knowledge, attitude, and skills related to their desired foods and life science fields; and
5. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Bioresource Science]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a high level of interest in systematically understanding life phenomena related to the production and use of biological resources based on the studies from the molecular level to ecosystems basis;
2. Have a high interest in understanding and dissolving various problems in the production of biological resources from regional to global scopes regarding roles and trends of biological resources in food production, their application to human life, and their relationships with the natural environment;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
4. Have acquired abilities at the level of completing an undergraduate of university course or higher regarding knowledge, attitude, and skills related to their desired biological resources and science fields; and
5. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Life and Environmental Sciences]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have a broad interest in the life science fields from the molecular level to whole environments and ecosystems, and who wish to acquire basic research abilities for a specific field and to learn the theories and methods of understanding and utilizing these abilities from a comprehensive perspective supported by related expertise and skills;
2. Wish to understand various problems existing in life science and environmental science, and to solve them in cooperation with organizations outside the university and the international community;
3. Wish to play an active role as a generalist who covers areas outside life science and environmental science without being constrained by their own expertise;
4. Have acquired a command of English at the level of completing an undergraduate of university course or higher;
5. Have acquired abilities at the level of completing an undergraduate of university course or higher regarding knowledge, attitude, and skills related to their desired specialized fields; and
6. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Basic Biology]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have acquired basic knowledge and skills in biology at molecular, cellular, individual, ecological, and evolutionary levels that should have been acquired in the related faculties;
2. Have acquired a command of English at the level of completing an undergraduate of university course or higher; and
3. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Mathematical and Life Sciences]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Are equipped with basic academic abilities in the fields of mathematics, physics, chemistry, and biology;
2. Have an ambition to open up a new research field for the mathematical science, molecular science, and life science fields as well as integrated fields;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher; and
4. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

[Program of Biomedical Science]

Based on its Diploma Policy and Curriculum Policy, this program expects to admit students as described below.

Students who:

1. Have an interest in medical and scientific knowledge that can support people's health and longevity, and who aspire to contributing to the development of life science, medical science, and related industrial fields;
2. Can view health and pathologic conditions multilaterally from a basic biological perspective;
3. Have acquired a command of English at the level of completing an undergraduate of university course or higher; and
4. Have acquired common sense and ethical standards as a working member of society.

In order to admit such individuals, this program selects applicants through a multifaceted and comprehensive evaluation process based on its own Diploma Policy and Curriculum Policy, using interviews, academic tests, and external examinations.

2. Basic Policy regarding Admissions Screening

The Graduate School of Integrated Sciences for Life, consisting of the program of Biotechnology, the program of Food and AgriLife Science, the program of Bioresource Science, the program of Life and Environmental Sciences, the program of Basic Biology, the program of Mathematical and Life Sciences, and the program of Biomedical Science, aims to develop postgraduates equipped with the abilities required to pursue a wide range of career paths after completion of their studies. In light of the educational goals and objectives specified in the diploma and curriculum policies of individual departments, we will implement admissions screening based on our diploma policy and curriculum policy, and evaluate individual applicants from a comprehensive and multidimensional perspective. We will also clearly specify the qualities required of students for admission and the evaluation methods.

The Graduate School of Integrated Sciences for Life, Hiroshima University, is recruiting students for the Master's Course in the Department of Integrated Science for Life to be enrolled in April 2024.

1. Number of Students to Be Recruited and Venue for Examinations, etc.

| | Program | Number of students to be recruited | Examination Date | Examination Venue | Inquiries • Submission addresses |
|--|---------------------------------|------------------------------------|--|------------------------------------|---|
| Department of Integrated Sciences for Life | Biotechnology | A few | One day between January 15 and February 6, 2024 * Please refer to the "Note" below. | *Please refer to the "Note" below. | Support Branch Office for the fields of Science, Hiroshima University 1-3-1, Kagamiyama, Higashi-Hiroshima, 739-8530 TEL: (082) 424-7008, 7009 |
| | Food and AgriLife Science | | | | Support Office for the fields of Biosphere Science (Graduate Student Affairs), Hiroshima University 1-4-4, Kagamiyama, Higashi-Hiroshima, 739-8528 TEL: (082) 424-7908 |
| | Bioresource Science | | | | Support Office for the fields of Integrated Arts and Sciences (Graduate Student Affairs), Hiroshima University 1-7-1, Kagamiyama, Higashi-Hiroshima, 739-8521 TEL: (082) 424-6316 |
| | Life and Environmental Sciences | | | | Support Office for the fields of Science (Graduate Student Affairs), Hiroshima University 1-3-1, Kagamiyama, Higashi-Hiroshima, 739-8526 TEL: (082) 424-7309, 4468 |
| | Basic Biology | | | | |
| | Mathematical and Life Sciences | | | | |
| | Biomedical Science | | | | |

Note : Examination date, time, and venue will be notified individually later.

2. Applicant Eligibility

Applicants must satisfy one of the following qualifications or be expected to receive any one of the following qualifications by March 31, 2024. Applicants shall be residing in Japan and must make an affirmation of admission when applicants will pass the entrance examination.

- (1) have completed a 16-year course of formal education outside Japan;
- (2) have taken a correspondence course from an overseas educational institution in Japan and completed a 16-year course of formal education;
- (3) have completed an undergraduate course of an overseas-based educational institute located in Japan that has been approved by the Minister of Education, Culture, Sports, Science and Technology (MEXT), whose graduates are regarded as having completed 16-year course of formal education.
- (4) have been conferred, a degree equivalent to a bachelor's degree through attending an overseas university or other overseas school (limited to those whose education and research activities have been evaluated by persons who have been certified by the relevant country's government or a related institution, or have been separately designated by the Ministry of Education, Culture, Sports, Science and Technology as being equivalent to such) and graduated from a course that requires 3 or more years to complete (Includes graduating from a course implemented by the relevant overseas school while living in Japan through distance learning, as well as graduating from a course implemented by an educational facility established with the relevant overseas country's school education system and has received the designation mentioned above).

Be sure to contact each support office in charge of the program before the application period, if you think you have academic achievements equivalent to or higher than those having completed an undergraduate course at a university.

3. Application Procedures

(1) Application methods

Applicants are required to apply using “online application system”, and send the necessary documents by post. (Partially online application hereinafter referred to as “online application”)

<Online application>

- 1) Enter your personal information.
- 2) Pay the application fee, 30,000 yen.
- 3) All application documents must be either sent by mail or delivered in person to the aforementioned address.

Note: Online application, entering necessary information on the website and paying the application fee, is the initial registration process, and doesn't mean the completion of the application procedure. **The application procedure wouldn't be completed without either sending or delivering in person all the necessary application documents by the due date.** Be sure to send or bring in person all the necessary application documents to the support office (the aforementioned address). Application documents must arrive within the specified period at the support office. Fully paper-based application without registering online application cannot be accepted in this graduate school.

(2) Application period

Applicants must complete all of the above procedures (from 1 to 3 in (1)) within the application period.

From January 5, 2024 to January 11, 2024 (No later than 17:00 (JST))

(3) Online application

| <For inquiries concerning online application system and UCARO website> | |
|--|---|
| Online Application Help Desk (Japanese Speaking Only) | TEL.03-5952-3902 Inquires accepted from 10:00 am to 6:00 pm (*Except Saturday, Sunday, national holidays) |
| UCARO Support Office (Japanese Speaking Only) | TEL03-5952-2114 Inquires accepted from 10:00 am to 6:00 pm (*Except from December 30 to January 3) |

- If you have any questions regarding the entrance examination, please contact the support office stated on page 5 in these guidelines. Inquiries are accepted from 8:30 to 17:00. (Except Saturday, Sunday, and national holidays)

<How to apply > Complete the following eight steps within the application period stated below:

Step 1: Access the online application system

Access the online application system from the Hiroshima University Admissions Information web page:
<https://www.hiroshima-u.ac.jp/en/nyugaku>

Step 2: Select 'Membership Registration' on the UCARO log in screen.

Hiroshima University uses the UCARO website for the process from the application to enrollment procedures.

UCARO is an Internet application and enrollment procedure support system.

Account registration for UCARO is required for all applicants (free of charge) and it enables applicants to use the above online application system and complete the enrollment procedures.

Step 3: (If you have, otherwise, skip 3) Enter the Account

Enter the alphanumeric code (consisting of 8 or more characters) which you received from the Graduate School.

Applicants who wish to exempt the entrance examination fee should contact the support office (page 5) before applying. Those applicants who are judged to be applicable will receive the Account.

Step 4: Input your application data into the Internet application system

Follow the instruction on the screen and enter your name, address, etc.

Step 5: Confirm the necessary documents and uploaded your photo

Confirm the necessary documents when they are shown and upload a digital photo of yourself.

※The uploaded photo, which will be used for identification at the examination, will be also used for your student ID card after enrollment and will be maintained in the university's educational system until graduation.

Therefore, please upload an appropriate photo for use after enrollment as well.

Once uploaded, your photo will not be allowed to be replaced.

A fee of JPY 1,000 will be charged for changing the content of your student ID card (photo and your name) after enrollment.

Step 6: Payment of entrance examination fee (JPY 30,000)

Choose the method of payment from the following list. For applications from outside Japan, only credit card payments can be accepted.

1. Credit Cards: VISA, MasterCard, JCB, AMERICAN EXPRESS, Diners Club
2. Convenience Stores: 7-Eleven, LAWSON, MINISTOP, FamilyMart, Daily Yamazaki, Seicomart
3. Banking facilities' ATM 【Pay-easy】
4. Online Banking

(Note)

***In addition to the entrance examination fee, applicants must cover the remittance fees.**

*Applicants need to pay the Processing Fee (The amount of Processing Fee will be notified at the time of online application).

Important notices regarding the entrance examination fee

The examination fee, once paid, will not be refunded for any reason.

However, in cases (1) and (2) below, the examination fee is refundable after deducting the bank transfer fee. Therefore in such cases, please clearly write the "reason for demand of refund", "name", "postal code", "address", "transfer destination information" and "contact telephone number" in the prescribed format given from the university and send it to the address mentioned page 5 by postal mail by Thursday, February 22 2024. (In any case, the Online Application Processing Fee is ineligible for a refund.)

(1) If the application documents have not been submitted, or if they have not been accepted

(2) If duplicate payments of the entrance examination fee have been made in error

Step 7: Initial registration process complete (Your application is NOT completed yet.)

You will be issued with a Registration Number (not your Examinee's Number). Please make a note of it or to print out a copy of the computer screen showing the number. The Registration Number is needed for confirming the application details later, and for sending the application documents by post.

Step 8: Submission of application documents

Submission Address: Each support office (see page 5)

All application documents must be either sent by registered mail or delivered in person to the support office. If you submit the application documents directly to the support office, application documents are accepted from 8:30 to 17:00 on a weekday. Please note that the office is closed on Saturday, Sunday, and national holiday.

If you send the application documents by mail, you must send them by registered mail and ensure that the documents reach the office by Thursday, January 11, 2024. Should the application documents fail to reach the office by that date, however, those postmarked on or before Monday, January 8, 2024 can be accepted.

On the envelope, please write “Application for the Program of ○○○○○, the Graduate School of Integrated Sciences for Life, Hiroshima University” in red ink.

(4) Documents to be submitted (Specified forms can be downloaded from the Home Page.)

| | | |
|----------|--------------------------------------|--|
| A | Academic Transcripts | Should be prepared and signed by the president/dean of the university from which you have graduated and sealed securely. |
| B | Certificate of (Expected) Graduation | Should be prepared and signed by the president/dean of the university from which you have graduated. *If you are a graduate or a current student of a university in China, please obtain the following document by requesting it at “中国高等教育学历证书查询(CHSI)” (http://www.chsi.com.cn/xlcx/bgys.jsp), and submit it to us together with “毕业证书(Certificate of Graduation)” and “学士 (硕士) 学位证书 (Bachelor/Master's Diploma)”. • Graduates: Online Verification Report of Higher Education Qualification Certificate (教育部学历证书电子注册备案表) • Expected Graduates: Online Verification Report of Student Record (教育部学籍在线验证报告) Please note that applicants must pay the issuing fee for the Online Verification Report (2 元/ certificate) by themselves. Also be sure that there are 15 or more days left until the expiration date of the online verification at the time of its submission. |
| C | Curriculum vitae | (Use the official form) All the schools/educational institutions you have enrolled in shall be written. |
| D | Personal Statement | (Use the official form: Summarized within 2 pages) Should be described yourself and the reason for applying for this graduate school. |
| E | Research Plan | (Use the official form) Submit the research plan in master’s course written in about 400 English words. |
| F | Reference Materials | Submit a score certificate (original) of the Japanese -Language Proficiency Test (JLPT) and/ or the TOEIC® / TOEFL® test, <u>if you have</u> . (The certificate will be returned to you after confirmation by the office.) |
| G | Return Envelope | A self-addressed standard-size envelope with appropriate postage (stamps) |

(5) Address for submission of application documents:

Please see page 5 of these application guidelines.

(6) Pre-arrangements for special needs applicants

Those who require special consideration for taking examinations and/or pursuing an academic program due to a disability or other legitimate reason must first contact the Support Office (see page 5) and then submit a statement of information as described below (in free format) to provide advance notice so that necessary arrangements may be made.

(a) Period of statement submission: From December 4, 2023 to December 6, 2023

(b) Information to include in the statement

[1] Applicant's name, address, and contact telephone number

[2] Name of the last school attended, the name of program in which you wish to enroll, and the name of the expected academic supervisor

[3] Type and degree of disability (If you are being treated, please submit a medical certificate.)

[4] Requested consideration regarding examinations

[5] Requested consideration after enrollment

[6] Arrangements made at school(s) previously attended

[7] Description of daily life

4. Examination Date and Time

| Examination Date | Examination | Time |
|---|--|-------------|
| One day between January 15 and February 6, 2024 | Interview (oral) (about 30 minutes/person) | ※ |

* Examination date, time, and venue will be notified individually later.

5. Screening Criteria

Screening will be based on the results of examinations (documents screening and interview).

The decision will be made based on a comprehensive evaluation of the application documents and interview (evaluated by grade-based scores: maximum 100points each)

The oral examination (interview) consists of questions which evaluate the applicant's eligibility for his/her high motivation for learning at our graduate school, necessary basic knowledge in graduate course, and English/Japanese-language ability.

6. Announcement of Successful Applicants

12:00 (expected), Friday, February 16, 2024

- (1) The Graduate School will send letters of acceptance to successful applicants. If you do not receive the letter by Thursday, February 22 even if your ID number is on the list of successful applicants, please inquire at each support office (page 5).
- (2) Successful applicants' ID numbers will be released on the website of the Graduate School of Integrated Sciences for Life, Hiroshima University. Please note that the announcement of the website will be unofficial. Official announcement will be made via the letters of acceptance. The office will not accept inquiries by phone regarding the results of the examinations.

7. Enrollment Fee and Tuition Fee

Payment

Enrollment Fee: ¥282,000

Tuition Fee: ¥535,800 per year (¥267,900 per semester)

- (1) The enrollment fee, once paid, will not be refunded for any reason.
- (2) The enrollment fee and tuition shown above were correct as of April 2023. If they are changed, students must pay the revised amount.
- (3) Details of enrollment procedures, which will be conducted in mid-March, 2024 for April admission, will be notified later to successful applicants.

8. Hiroshima University Excellent Student Scholarships

To inspire students to study hard and to foster excellent human resources, Hiroshima University institutes its own scholarship system that supports students who show excellent performances at their research achievement and so on.

9. Personal Information

Your personal information (name, date of birth, sex, etc.) provided for screening will be used solely for the purpose of screening, announcement of results, and enrollment procedures. After your enrollment, the University will manage the information to use it for student support activities (filing applications for scholarships and for waiving/discounting tuitions, etc.), and survey and research activities (for instance, surveys and analyses of applicants in order to improve screening systems). The University shall neither appropriate the information for any other purpose nor provide it to individuals/groups other than faculty or staff members of the University.

10. Examination Information Disclosure

The disclosure of examination results (considered as personal information) may be requested in the following manner:

- (1) Obtain an examination information disclosure application form:
Write to the address below, indicating on the envelope 入試情報開示申請書請求 or "Examination Information Disclosure Application Form Request," enclosing a self-addressed return envelope (long No. 3 type, 120 mm×235 mm) bearing the examinee's name, address and postal code and an 94 yen stamp.
- (2) Complete the examination information disclosure application form, and send by post the documents listed below between April 1 and May 31, 2024 (postmarked) to the address below.
 - ① Completed examination information disclosure application form
 - ② Original Examination Card for the admission examination of the Graduate School of Integrated Sciences for Life, Hiroshima University (a copy will not be accepted; the original Card will be returned at the time of information disclosure)
 - ③ Self-addressed return envelope (long No. 3 type, 120 mm × 235 mm) bearing the examinee's name, address and postal code and a 414 yen stamp.Disclosure Applicants may be requested to correct any submitted documents found to be inappropriate.
- (3) The Graduate School of Integrated Sciences for Life will send a notice of examination information disclosure to the Disclosure Applicant by simplified registered mail within 30 days from the receipt of the application form.

11. Frontier Development Program for Genome Editing

Hiroshima University has launched the Frontier Development Program for Genome Editing, which was selected as a WISE program by MEXT in 2018. This program consists of the Life Science Course (5-year curriculum) and the Medical Course (4-year curriculum), providing students with the opportunity to acquire basic and applied knowledge and to learn techniques of genome editing. This program aims to develop human resources that master genome editing technology and connect it directly to industry.

Life Science Course (5-year curriculum)

In the first and second years, students will learn basic and advanced genome editing techniques. From the third year, they will conduct research utilizing the knowledge they have acquired. Through basic courses on social implementation of technologies and internships, they will be trained to become experts able to work at the cutting edge of genome editing technology.

◆Admission

The Life Science Course of the Frontier Development Program for Genome Editing is open to students who will be admitted to the Master's Course of the Graduate School of Integrated Sciences for Life in April 2024.

Those who wish to enroll in this program must apply for this program in addition to applying to the Graduate School. For details, please visit the website at the following URL.

- * The prospective advisor of the applicant must be someone from the list of faculty members of the Frontier Development Program for Genome Editing.
- * Students in this program must fulfill the requirements for both their major in the Graduate School and this program simultaneously.

URL : <https://genome.hiroshima-u.ac.jp/en/recruitment/index.html>

◆Financial Support for Students *see Note 1

We currently offer financial support to students in the program as described in (1), (2), (3), and (4) below. This support is provided only during the standard course period.

- (1) 50,000 yen per month for six months will be provided to up to three students who are recognized as having excellent academic performance and outstanding achievements in academic activities after enrollment. (Details of the application procedure will be announced after admission.)
- (2) Free tuition will be provided for the third and later years of the Life Science Course and for all years of the Medical Course. (Some students may not be eligible due to their academic performance.) *see Note 2
- (3) Ikenoue Student Dormitory is available with priority for two years after enrollment in the program. (Boarding fee, common expenses, and utility fee will be charged.)
- (4) Travel grants (transportation and accommodation expenses) will be provided up to the amount specified by the program for students' educational and research activities. (Some students may not be eligible due to their income. Details will be announced after admission.)

*Note 1: Financial support is as of April 1, 2023 and is subject to change.

*Note 2: Financial support for (2) will end on March 31, 2025. Financial support after April 1, 2025 is not yet confirmed.

◆Contact for the Frontier Development Program for Genome Editing

Collaboration Office, Education Office, Hiroshima University

1-1-1 Kagamiyama, Higashi-hiroshima City, Hiroshima, Japan 739-8524 (Room 809, Building B of the Graduate School of Education)

TEL : 082-424-6819 Email : leading-program@office.hiroshima-u.ac.jp

12. Additional Notices

- (1) **Prior to application, please consult about the research programs with a faculty member under whom applicant wishes to study.** (<https://www.hiroshima-u.ac.jp/en/ilife/research>)
- (2) Hiroshima University has established the university's Rules on Security Export Control in accordance with the Foreign Exchange and Foreign Trade Act, and conducts strict examinations for acceptance of international students, etc. Therefore, please be advised that International applicants may be unable to receive their desired education or conduct their desired research due to the restriction by the above regulations.
- (3) The certificates to be submitted must be the originals or certified photocopies. Uncertified photocopies would not be recognized as official certificates.
- (4) No changes are permitted in the content of documents after their submission.
The examination fee will not be returned for any reason.
- (5) Any forgery or falsification of the documents and/or academic fraud would result in cancellation of acceptance even after passing examination or admission.
- (6) If an applicant could not graduate from the university before the admission date, he/she would lose the eligibility to enter our graduate school in this session.
- (7) Application Guidelines and other related documents can be downloaded from the website of the Graduate School of Integrated Sciences for Life, Hiroshima University.
- (8) If the program of an academic supervisor under whom you wish to study is changed due to program reorganization, the program you belong to may change.
- (9) For further information, please contact the following each support office in charge of the program(s) (page 5).

13. Other Points of Attention

Smoking is prohibited entirely in All Hiroshima University campuses from January, 2020.

大学院統合生命科学研究科主指導教員一覧表 List of Academic Supervisors

生物工学プログラム Program of Biotechnology (1/5)

| 担当教員 Academic Staff | | 研究内容 Research Fields | キーワード Keywords |
|------------------------|-----------------------------|---|--|
| 教授 Professor | 秋 庸裕 Tsunehiro AKI | 機能性油脂を生産する微生物のゲノム育種とその健康食品、医薬品、化学品、バイオエネルギー供給への応用展開をめざした研究 Genomic breeding of oleaginous microorganisms for provision of new health foods, pharmaceuticals, chemicals and sustainable bioenergy. | 脂質工学, 微生物バイオ, バイオリファインリー Lipid engineering, Microbial biotechnology, Biorefinery |

Chemical Biotechnology: Development of bioprocess for production of fine and commodity chemicals using solvent tolerant bacteria. | 環境バイオテクノロジー, 分子微生物生態工学, 生体触媒 Environmental biotechnology, Molecular microbial ecological engineering, Biocatalyst |
| 教授 Professor | 河本 正次 Seiji KAWAMOTO | アレルギーの発症・治癒の分子免疫学と新規治療法開発, アレルギー等炎症性難病を予防する機能性食品の開発, 免疫寛容誘導機構の解明と次世代免疫抑制剤・新規抗炎症薬開発への創薬展開 We are interested in the molecular mechanisms underlying the pathogenesis of allergic disorders. We are also searching for anti-inflammatory foodstuffs, which are useful to prevent atopic and proinflammatory disorders. Another ongoing project is to elucidate mechanisms involved in the establishment of immune tolerance, and its application to the development of novel immunosuppressants and anti-inflammatory drugs. | アレルギー・免疫, 動物細胞工学, 機能性食品 Allergy/Immunology, Animal cell technology, Functional foods |
| 教授 Professor | 黒田 章夫 Akio KURODA | 分子進化学を用いて新たなタンパク質・ペプチドを創成し、バイオセンサーや治療に応用する研究。例えば、アスベスト結合タンパク質を創成してアスベスト検査に応用する。また膜結合ペプチドを創成し、ガンなどの病気に関わるエクソソームやマイクロバシクルなどの膜小胞の分離に応用する。 Creation of new proteins/peptides by evolutionary molecular engineering. For example, we created an asbestos-binding protein in order to analyze asbestos. We also created a membrane-binding peptide in order to isolate extracellular membrane vesicle (exosome, microvesicle) that have great potential as diagnostic tools and biomarkers for many kinds of diseases such as cancers. | タンパク質工学, 進化学, バイオセンシング Protein engineering, Evolution engineering, Biosensing |
| 教授 Professor | 中島田 豊 Yutaka NAKASHIMADA | 微生物のエネルギー代謝経路を培養学的または分子生物学的に改変し、特にバイオマスなどの再生可能エネルギー由来の原料をもとにして、水素、メタン、アルコール類などの有用物質を効率的に生産する技術研究 The subject of research in a field of energy metabolic engineering for production of bio-fuels such as methane, hydrogen and alcohols, and bio-materials from renewable feedstocks such as biomass based on fermentation technology and genetic engineering of microorganisms. | 発酵工学, 生物化学工学, 代謝工学 Fermentation technology, Biochemical engineering, Metabolic engineering |

| 担当教員 Academic Staff | | 研究内容 Research Fields | キーワード Keywords |
|----------------------------|----------------------------|---|--|
| 教授 Professor | 水沼 正樹 Masaki MIZUNUMA | 単細胞真核生物・酵母を用いて、Ca ²⁺ シグナル伝達経路の全貌を明らかにする。特に、Ca ²⁺ が関与する細胞周期、寿命、および細胞死の分子機構を解明する。また、多細胞生物・線虫を用いて老化・寿命機構に関する研究も行う。 We focus on mechanisms of Ca ²⁺ -dependent signaling using the unicellular eukaryote, <i>Saccharomyces cerevisiae</i> , as a model system. In particular, we are currently investigating aspects of calcium-dependent signal transduction in yeast, including cell-cycle, life span, and apoptosis. We also study on aging and life span in <i>Caenorhabditis elegans</i> . | 酵母, 線虫, 寿命 Yeast, <i>C. elegans</i> , Lifespan |
| 客員教授 Visiting Professor | 赤尾 健 Takeshi AKAO | 清酒酵母をはじめとした醸造用酵母の応用ゲノミクス。酵母のゲノム情報を利用して菌株の精密識別技術の開発、清酒酵母の有用機能の遺伝的要因の解明、効率的育種技術の開発などを目的としている。 Applied genomics of sake yeast and the related industrial strains: Utilization of the genome information for exploration of unique DNA markers in each lineage, genetical study on characteristic features of valuable sake yeast strains and development of efficient breeding method. | 清酒酵母, 応用ゲノミクス, 醸造特性の遺伝学 Sake yeast, Applied genomics, Genetics of brewing characteristics |
| 客員教授 Visiting Professor | 磯谷 敦子 Atsuko ISOGAI | 清酒や焼酎の香り成分に関する研究を行っている。官能特性に寄与する成分を明らかにし、その生成機構の解明および制御技術の確立を目指している。 Studies on the aroma compounds in sake and shochu, aiming at identification of components responsible for their characteristics, elucidation of their formation mechanism, and development of control techniques. | 清酒, 焼酎, 香り成分 Sake, Shochu, Aroma compounds |
| 客員教授 Visiting Professor | 岩下 和裕 Kazuhiro IWASHITA | 麹菌を中心とした醸造微生物について、清酒などの製品や麹菌の特性に関わる分子メカニズムをゲノミクス、メタボロミクスを中心とした総合オミックスにより解析します。また、その成果を利用して、麹菌による機能性物質の生産・制御、新たな醸造法の開発など、環境や人の健康に優しい醸造学を目指している。 The genomics and metabolomics study of industrial microorganisms (especially Japanese national fungi of <i>Aspergillus oryzae</i>) to illustrate the primitive molecular mechanisms. The outcome of our researches should be applied to the design for new industrial strains and new process to produce beneficial metabolite and fermentation products. | 醸造微生物, 総合オミックス解析, イノベーション Fermentation microorganism, Multiomics analysis, Innovation |
| 客員教授 Visiting Professor | 森田 友岳 Tomotake MORITA | 発酵によるバイオベース素材の生産と応用に関して、微生物のスクリーニングや機能解析、遺伝子組換えによる育種改良を行っている。 To develop new bio-based materials, we are promoting the screening, characterization, and genetic modification of industrial microbes. | バイオベース素材, 産業微生物, 応用微生物学 Bio-based materials, Industrial microbes, Applied microbiology |
| 准教授 Associate Professor | 青井 議輝 Yoshiteru AOI | 環境中に多く存在している難培養性微生物を対象に、①革新的な分離培養技術の開発、②未培養重要微生物の機能解明と利用、③未知増殖制御メカニズムの解明を目的とする。それらを通じて、微生物の生態および未知なる機能を明らかにし、微生物を制御する術を手に入れること、さらに医薬品を中心とした未利用資源の開拓に向けた新たな道筋を構築することを目指している。 Our research goals are (i) bringing innovation to microbial cultivation, by development of radically new cultivation technology; (ii) isolation of environmentally important or potentially useful but yet-to-be cultured microorganisms; (iii) puzzling out the reason as to why most of the environmental microorganisms are recalcitrant for cultivation. | 未知微生物, 難培養性微生物, 休眠・覚醒 Unknown microbes, Unculturable microbes, Dormancy and resuscitation |

| 客員教授 Visiting Professor | 畠山 慶一 Keiichi HATAKEYAMA | 臨床情報とがんゲノムデータの統合を目指したがんゲノム解析研究 腫瘍細胞濃縮技術を用いたがんゲノム解析の高精度化と臨床応用 Cancer genome analysis to integrate of clinical information and genome data. Improving the accuracy of cancer genome analysis using tumor cell enrichment and its application in clinical practice. | がんゲノム, 変異, 体細胞/生殖細胞系列変化, 臨床応用 Cancer genome, mutation, somatic/germline alteration, clinical application |
| 客員教授 Visiting Professor | 渡邊 朋信 Tomonobu M WATANABE | 生命現象を定量する光学計測技術の開発とそれらを用いた幹細胞研究および医学・産業応用 Stem cell researches with development of optical measurement technologies to quantify biological phenomena, and medical/industrial applications of them. | 光学顕微鏡, 分光学, 生物物理学, 幹細胞 Optical speticroscopy, quantitative biology, biophysics, stem cell |
| 准教授 Associate Professor | 井川 武 Takeshi IGAWA | 両生類の種分化と環境適応に関わるゲノム進化学的研究 Genome evolution underlying speciation and environmental adaptation of amphibians. | 両生類, 適応進化, ゲノミクス Amphibians, Adaptive evolution, Genomics |
| 准教授 Associate Professor | 上野 勝 Masaru UENO | 真核生物のテロメア維持機構・DNA修復機構の解明と, その抗老化・抗癌関連医薬品への応用研究 Study on molecular mechanisms of telomere maintenance and DNA repair and their applications for development of anti-cancer and anti-ageing agents. | テロメア, がん, 老化 Telomere, Cancer, Aging |
| 准教授 Associate Professor | 奥村 美紗子 Misako OKUMURA | 光感知メカニズムの解明. 表現型可塑性の分子基盤の解明 Molecular mechanism of phototransduction. Molecular mechanism of phenotypic plasticity. | 線虫, 光受容体, 表現型可塑性 Nematode, Photoreceptor, Phenotypic plasticity |
| 准教授 Associate Professor | 久米 一規 Kazunori KUME | 細胞の機能を保証する細胞構造(オルガネラや細胞極性など)の制御機構に関する研究 Study on the control mechanisms of cell structure (organelles and cell polarity etc.) which ensures cellular functions. | 細胞構造, オルガネラ, 細胞極性 Cell structure, Organelle, Cell polarity |
| 准教授 Associate Professor | 坂本 尚昭 Naoaki SAKAMOTO | ウニの発生をモデルとして, 形態形成遺伝子の転写制御, 発生過程における遺伝子・クロマチン・染色体の動態, インスレーターの作用機構について研究 Research for transcriptional regulation of morphogenetic genes, nuclear dynamics of gene, chromatin and chromosome during development, and mechanism of insulator activity, using the sea urchin development as a model. | ウニの発生, 転写, 核内動態 Sea urchin development, Transcription, Nuclear dynamics |
| 准教授 Associate Professor | 杉 拓磨 Takuma SUGI | 個と集団の行動を支配する物理則の研究, 神経ネットワーク老化機構の研究 Behavioral systems biology and neural network aging. | 行動, 神経ネットワーク老化, 光計測技術開発, Behavior, Imaging, Neural network aging |
| 准教授 Associate Professor | 濱生 こずえ Kozue HAMAO | 動物細胞の細胞骨格制御と細胞分裂の分子機構に関する研究 Molecular mechanisms of cytoskeletal regulation and cell division in animal cells. | 細胞骨格, 細胞分裂, 細胞質分裂 Cytoskeleton, Mitosis, Cytokinesis |
| 准教授 Associate Professor | 吉田 将之 Masayuki YOSHIDA | こころの生物学的基盤に関する研究 Biological basis of emotion, learning, and mind in animals. | 動物心理, 情動, 神経科学 Animal psychology, Emotion, Neuroscience |

大学院統合生命科学研究所主指導教員一覧表 List of Academic Supervisors

生命医科学プログラム Program of Biomedical Science (3/3)

| 担当教員 Academic Staff | | 研究内容 Research Fields | キーワード Keywords |
|------------------------|---------------------------|--|---|
| 助教 Assistant | 高橋 治子 Haruko TAKAHASHI | 生体外(in vitro)3次元がん組織モデルおよび画像・オミックスデータを用いた統合的解析による, がん悪性化メカニズムの解明と治療基盤応用 Analysis of the malignant mechanism of cancer and its therapeutic application by integrated analysis using 3D in vitro cancer tissue models, images and omics data. | 3次元in vitroモデル, がん微小環境, 抗がん効果 3D in vitro model, Tumor microenvironment, Anti-cancer |
| 助教 Assistant | 湯川 格史 Masashi YUKAWA | ゲノムの安定性保持に必須な微小管形成機構に関する研究と有用生理活性物質の開発 Our research focuses on the molecular mechanisms to establish and maintain a bipolar spindle structure, which is essential for proper chromosome segregation. We also aim to implement our findings towards the development of novel drugs and therapeutic technologies by which to build and sustain healthy aging society. | 細胞周期, 染色体分配, 細胞骨格 Cell cycle, Chromosome segregation, Cytoskeleton |
