活動の内容 (準備, 広報活動, 当日の様子等)
We organized the seminar and exhibition on 2 nd November 2013 at Engineering faculty during University festival. The 9 speakers from various organizations were invited to introduce the knowledge of their research works, share their experience and inform an opportunity to work. We had discussed and exchanged opinions to each other with informally talk. We had also welcomed outside person who came to University festival to join us.

成果・課題

We are not going to talk about our research deeply with technical terms but make them easy to understand with simple quizzes and a lot of pictures. The presentations are based on our daily lives and though each person's study field is different everyone can enjoy our activity and we will be able to see the world differently. We got a lot of knowledge from many fields of research works and the presenters shared their experiences and useful information and suggestion to the others.
