

# For entrants in AY 2024

Appended Form 1

## Specifications for Major Program

Name of School (Program) School of Engineering Cluster 1 (Mechanical Systems, Transportation, Material and Energy)

Program name (Japanese)	エネルギー変換プログラム
(English)	Program of Energy Transform Engineering
1.Academic degree to be Acquired : Bachelor's degree in Engineering	
2. Overview	
<p>This Program (Energy Transform Engineering) in Cluster 1 helps students acquire the basic knowledge and perspective needed by engineers through the study of design and drafting, as well as through practical training at the Phoenix Workshop. Also, this program offers education in such fields as thermodynamics, basic physics related to quantum physics, fluid dynamics, combustion engineering, and heat-transfer engineering, all of which are indispensable for engineers.</p> <p>Through such education, this program aims at nurturing engineers and researchers who, contributing to solving energy and environmental problems from a global perspective, being able to assume cutting-edge design and development roles in engineering. In order for students to develop their perspectives in other related fields with also gaining in-depth expertise, this program will be run not only by specialists from the closely-related program of Energy Transform Engineering, but also by specialists from the other three programs in Cluster 1, as well as by highly-skilled technical personnel from the Phoenix Workshop.</p> <p>Students are assigned to this program in the second semester of the second year. Then, in the first semester of the fourth year, students are assigned to their respective research laboratories, choose their research topics, and write up their graduation theses. For your reference, as of last year about sixty percent of graduates from Cluster 1 in the School of Engineering had advanced to graduate school. Graduates are employed in the general machinery and automotive fields, as well as in electronics, information &amp; communications, heavy industry, the chemical industry, and a broad range of other industries. Centering on manufacturers in the fields of heavy industry, transportation equipment, machinery, and materials, they work actively in the fields of research, design, production engineering, and engineering marketing.</p>	
3.Academic Awards Policy (Goals of the Program and Policy for Awarding Degrees)	
<p>The Program of Energy Transform Engineering develops professionals capable of taking action and displaying great humanity and rationality, who can contribute to the peace, development, survival, and realization of happiness of humankind, while striving for co-existence with nature.</p> <p>This program awards a bachelor's degree in engineering to students who have acquired the following abilities in a balanced manner as well as the number of credits necessary to meet the standard of the course.</p> <ul style="list-style-type: none"><li>• The ability with the basic technological knowledge and perspectives required by engineers, centering on mechanical/material-related subjects as well as with the fundamentals of engineering associated with energy and of indispensable for such fields of engineering as thermodynamics, basic physics related to quantum physics, fluid dynamics, combustion engineering, and heat-transfer engineering.</li><li>• The ability to assume roles in the design and development of cutting-edge production technology, while having a broader perspective about human-machine relations and environmental issues.</li></ul>	
4. Curriculum Policy (Policy for Preparing and Implementing the Curriculum )	
<p>Achievement in learning is measured by performance rating in each subject and by the goals set by the Education Program. To ensure that students are able to achieve the goals of the program, the Program of Energy Transform Engineering develops and puts into practice a curriculum based on the following policy:</p> <ul style="list-style-type: none"><li>• In the first year, the students take Liberal Arts Education subjects such as Peace Science Courses, Basic Courses in University Education, common subjects, and Foundation Courses, as well as specialized basic subjects and specialized practical education, such as machine shop training.</li></ul>	

- In the second year, specialized basic subjects such as “Fluid Dynamics I” and “Thermodynamics I” become major subjects. The students choose one of four programs in Cluster 1 (Mechanical Systems Engineering, Transportation Systems, Material Processing, or Energy Transform Engineering) and are assigned to that program.
- In the third year, specialized subjects become major subjects. The students take required classes in accordance with the program they belong to.
- In the fourth year, the students are assigned to their respective research laboratories, choose their research topics, and write their graduation theses.

In the curriculum described above, teaching and learning will be implemented by utilizing active learning and online classes, depending on the delivery methods of the program, such as lectures and seminars.

In addition to strict grading using the standards clearly outlined in the syllabus, learning outcomes are evaluated based on the degree to which the goals set by the educational program are achieved.

#### 5. Program Timing/Acceptance Conditions

- When to start the program : The second semester of the second year
- Credit Requirements-: By the first semester of the second year, students must have acquired the Liberal Arts Education subjects and specialized basic subjects that are commonly specified in Cluster 1. Acceptance conditions for the program are not particularly specified.

#### 6. Qualifications to be Acquired

Type-1 High School Teaching License (Industry)  
 (Students must acquire the required number of credits for the Type-1 High School Teaching License (Industry), in addition to the required number of credits for this program.)

#### 7. Class subjects and course content

- \* For class subjects, see the Course List table on the attached sheet.
- \* For course content, see the syllabus for each fiscal year.

#### 8. Academic Achievements

At the end of each semester, the evaluation criteria are applied to each academic achievement evaluation item so that the level of attainment is clearly demonstrated.

Students’ grade calculation for each subject, from admission to the current semester, is given in one of three levels: “Excellent,” “Very Good,” and “Good,” based on evaluation criteria calculated by adding the weighted values to the numerically-converted values of their academic achievement in each subject being evaluated (S = 4, A = 3,

B = 2, and C = 1).

Evaluation of academic achievement	Converted values
S(Excellent: 90 points or higher)	4
A(Superior:80-89 points)	3
B(Good: 70-79 points)	2
C(Fair: 60-69 points)	1

Academic achievement	Evaluation criteria
Excellent	3.00~4.00
Very Good	2.00~2.99
Good	1.00~1.99

- \* For the relationship between evaluation items and evaluation criteria, see the attached Sheet 2 .
- \* For the relationship between evaluation items and class subjects, see the attached Sheet 3.
- \* For the curriculum map, see the attached Sheet 4.

#### 9. Graduation Thesis (Graduation Research) (Positioning, when and how it is assigned, etc.)

- Positioning

The graduation thesis is designed to be one component of the overall evaluation of academic achievement.

It is positioned as one of the major subjects to evaluate the following:

Ability/Skills (2) Developing the ability to solve engineering issues on one's own initiative with flexible thinking and creativity

Collective capacity (1) Developing communication skills and the ability to globally collect and dispatch information.

○ When and how it is assigned

When it is assigned: At the start of the fourth year. (Only those who satisfy the conditions for embarking on a graduation thesis will be assigned a thesis.)

○ Conditions for embarking on a graduation thesis

(1) Students must gain 43 credits or more out of 46 credits, the required number for graduation in Liberal Arts Education subjects.

(2) Students must gain 10 credits or more in the first group of specialized basic subjects

(3) Students must gain in Machine Design and Drawing, CAD, Machine Shop Training, Experiments in Mechanical Engineering, and Mechanical Engineering Design and Production.

(4) Students must gain 11 credits or more out of 15 credits, the required number in Liberal Arts Education subjects, in the second group of specialized basic subjects.

(5) Students must gain a total of 68 credits or more in specialized basic subjects and specialized subjects.

○ How it is assigned

The research details of each laboratory to which the students can be assigned are explained by giving out handouts at a briefing held in February, in the second semester of the third year. After the number of students acceptable to each laboratory is given at the start of the fourth year, students who can begin their graduation theses are assigned as requested. In the case that the number of students exceeds the acceptable limit for a laboratory, adjustments may be made.

#### 10. Responsibility-taking System

(1) PDCA Responsibility-taking System ("Plan," "Do," "Check," and "Act")

The cluster leader and program leader are responsible for executing this program. Faculty committee members responsible for this program make plans, while self-check/evaluation committee members responsible for this program make evaluations. The cluster and program teachers committee scrutinize the plans and evaluations from time to time for further improvement. When major issues arise, a working group may be established at the discretion of cluster leader and program leader.

(2) Program assessment

○ Criteria for program assessment

• Whether or not each class subject is properly allocated in light of the goals of the program, and whether course content is appropriate

• Whether or not, on average, students taking the course have achieved or exceeded the goals

• Whether or not the system runs in proper cycles that enable the continuous improvement of the program

○ How the program is assessed

• Conducting self-assessment for each subject based on class improvement questionnaires from students who have taken course, and based on performance rating results

• Conducting questionnaires (obtained at graduation) in suitable cycles, to evaluate the validity of the goals

○ Position on feedback to students and how it should be conducted

Search records of each student's learning status, prepared by tutors, are kept in the office. Based on these records, study guidance is given to each student. At the same time, requests from students are discussed at teachers' meetings as needed. Furthermore, based on the results of the course improvement questionnaires obtained from students, subject teachers draw up class improvement plans that reflect the questionnaire results.

Cluster 1 (Mechanical Systems, Transportation, Material and Energy)

⊙ Required subject (period of registration specified)

○ Compulsory elective subject (any of these subjects shall be registered)

△ Free elective subject (any of these subjects shall be registered)

Subject type	Required No. of credits	Class subjects, etc.	No. of credits	Type of course registration	Year in which the subject is taken(*The lower figure means semester)(Note 1)

No. of credits required for graduation	46																												

Note 1: When students fail to acquire the credit during the term or semester marked with ⊙, ○, △ in the boxes for the year in which the course is taken, they can take the course in subsequent terms or semesters. Depending on class subject, courses may be offered in semesters or terms different from those scheduled.

Note 2: The credit obtained by mastery of self-directed study of "Online Seminar in English A·B" cannot be counted towards the credit necessary for graduation. The credit obtained by Overseas Language Training can be recognized as Communication I or II if application is made in advance. For more details, please refer to the article on English in Liberal Arts Education in the student handbook.

Note 3: We have a recognition of credit system for foreign language proficiency tests. For more details, please refer to the article on Foreign Language in Liberal Arts Education in the student handbook.

Note 4: Students must take both 「Experimental Methods and Laboratory Work I(1credit)」 and 「Experimental Methods and Laboratory Work II(1credit)」.

Academic Achievement in Educational Program for Energy Transform Engineer  
The Relationship between Evaluation Items and Evaluation Criteria

Academic Achievements		Evaluation Criteria		
Evaluation Items		Excellent	Very Good	Good
Knowledge and Understanding	(1) To develop the ability to work positively and independently on the development of local societies, international society, and business and industries.	To be able to be sufficiently engaged in the development of local societies, international society, and business and industry.	To be able to be engaged in the development of local societies, international society, and business and industry at the standard level.	To be able to be engaged in the development of local societies, international society, and business and industry at the minimum level.
	(2) Acquiring necessary basic knowledge for an engineer and developing the ability to consider logically.	Acquiring necessary basic knowledge for an engineer and being able to sufficiently and logically consider it.	Acquiring necessary basic knowledge for an engineer and being able to logically consider it at the standard level.	Acquiring necessary basic knowledge for an engineer and being able to logically consider it at the minimum level.
Abilities and Skills	(1) Acquiring basis of mechanical system engineering steadily and developing the applied skill.	Acquiring basis of mechanical system engineering steadily, and being able to apply it sufficiently.	Acquiring basis of mechanical system engineering steadily, and being able to apply it at the standard level.	Acquiring basis of mechanical system engineering steadily, and being able to apply it at the minimum level.
	(2) Developing the ability of solving the technological issues with flexible ideas and creativity.	Based on flexible ideas and creativity, to be able to sufficiently solve problems related to engineering.	Based on flexible ideas and creativity, to be able to independently solve problems related to engineering to the standard level.	Based on flexible ideas and creativity, to be able to independently solve problems related to engineering at the minimum level.
Overall Abilities	(1) Cultivating abilities of communication and of internationally collecting information and releasing it	To be able to communicate sufficiently with others, collect and release information internationally.	To be able to communicate with others, collect and release information internationally at the standard level	To be able to communicate with others, collect and release information internationally at the minimum level.

Placement of the Liberal Arts Education in the Major Program

We aim to cultivate a well-rounded character, backed up by a broad range of basic knowledge and an understanding of global environmental issues and problems in the social environment. Furthermore, we aim to cultivate the ability to consider ways to solve problems in the context of the multifaceted relations between people and society, and between nature and engineering. To that end, the following are offered: (1) The acquisition of the necessary abilities and attitudes to see various social issues multilaterally and to understand the complete picture (2) The acquisition of a broader perspective after being exposed to fields outside of one's area of expertise (3) Through sports, the acquisition of knowledge of health and physical strength that form basis of human living (4) The cultivation of the ability to

Specialized Education	Optical Measurement Techniques	2	Elective	6semester					100	1					100
Specialized Education	Natural Energy Utilization Engineering	2	Elective	6semester					100	1					100
Specialized Education	Transportation	2	Elective	4semester-4T					100	1					100
Specialized Education	Graduation Thesis	5	Required	7,8semester							55	1	45	1	100

# Curriculum Map of Energy Transform Engineering

Academic achievements		1st grade		2nd grade		3rd grade		4th grade		
		Spring	Fall	Spring	Fall	Spring	Fall	Spring	Fall	
Knowledge and Understanding	To develop the ability to work positively and independently on the development of local societies, international society, and business and industries.	Introduction to University Education(◎)	Area Courses(○)	Area Courses(○)	Area Courses(○)	Reliability Engineering(△)	Internship(△)			
		Peace Science Courses(○)	Health and Sports Courses(○)							
		Area Courses(○)								
		Health and Sports Courses(○)								
	Acquiring necessary basic knowledge for an engineer and developing the ability to consider logically.	Introduction to Information and Data Sciences (◎)	CalculusII(◎)	Basic Electromagnetism(◎)						
		CalculusI (◎)	Linear AlgebraII(◎)	General Chemistry(○)						
		Linear AlgebraI (◎)	Seminar in Basic Mathematics II(◎)	Basic Engineering Computer Programming(◎)						
		Seminar in Basic Mathematics I (◎)	General Mechanics II(◎)							
		General Mechanics I (◎)	Experimental Methods and Laboratory Work in Physics I- II(◎)							
			Experimental Methods and Laboratory Work in Chemistry I- II (○)							
Abilities and Skills	Acquiring basis of mechanical system engineering and materials processing steadily and developing the applied skill.		Applied Mathematics I(◎)	Applied Mathematics II(◎)	Applied Mathematics III(◎)	Engineering Mathematics A(○)	Synthesis of Applied Mathematics(○)			
			Practice of Mechanism(◎)	Probability and Statistics(◎)	Engineering Mathematics C(○)	Computer Programming(○)	Dynamics of Vibrations II(△)			
			Introduction of Mechanical and Transportation Engineering(◎)	Mechanics of Material I(◎)	Dynamics of Vibrations I(◎)	Mechanical Materials I(△)	Fracture Mechanics(△)			
			Machine Design and Drawing(◎)	Thermodynamics I(◎)	Materials Science(△)	Fusion and Solidification Processings I(△)	Plastic Working and Powder Metallurgy II(△)			
				Fluid Dynamics I(◎)	Elementary Electromagnetism(◎)	Machining(△)	Statistical and Thermal Physics(○)			
				Control Engineering I(◎)	Introduction to Quantum Physics(◎)	Heat Transfer II(○)	Internal Combustion Engines(○)			
				An Introduction to Engineering Materials(◎)	Fluid Dynamics II(◎)	Combustion Engineering Fundamentals(○)	Mechatronics(△)			
				Fundamentals of Materials Processing(◎)	Thermodynamics II(○)	Plasma Engineering(○)	Optical Measurement Techniques(○)			
					Heat Transfer I(◎)	Theory of Elasticity and Plasticity(○)	Machine Design(△)			
					Data Processing and Numerical Analysis(◎)	Dynamics of Vibrations II(△)	Fluid Machinery(○)			
					Mechanics of Materials II(△)	Electrical and Electronic Engineering(○)	Internal Combustion Engines(○)			
					Mechanism and Kinematics(○)	Mechanical System Control(△)	Radiation Engineering(△)			
					Control Engineering II(△)	Manufacturing System(△)	Nuclear Engineering(○)			
					Machine Elements Design(○)	Compressible Fluid Dynamics(○)	Measurement and Signal Processing (◎)			
					Systems Engineering(△)	Computational Solid Mechanics (○)	Natural-Energy Utilization Engineering(○)			
					Transportation(○)					
		Developing the ability of solving the technological issues with flexible ideas and creativity.	Introductory Seminar for First-Year Students(◎)	Machine Shop Training (a)(◎)	Machine Shop Training (b)(◎)	Systems Engineering(△)	Experiments in Mechanical Engineering(◎)	Mechanical Engineering Design and Production(◎)	Graduation Thesis(◎)	Graduation Thesis(◎)
					Computer Aided Design(◎)			Internship(△)		
	Comprehensive Abilities	Cultivating abilities of communication and of internationally collecting information and releasing it	Introductory Seminar for First-Year Students(◎)	Basic English UsageII(◎)			Experiments in Mechanical Engineering(◎)	Internship(△)	Graduation Thesis(◎)	Graduation Thesis(◎)
Basic English UsageI(◎)			Communication IIA(◎)	Technical English(◎)						
CommunicationIA(◎)			Communication IIB(◎)							
Communication IB(◎)										
Basic language I(○)										
	Basic language II(○)
