Required- only 60
seats available

With many pressures on people in society it is more important than ever to focus on wellbeing. At the forefront are concerns around how to improve well-being in order to achieve an inclusive society. By bringing together experts in the area from a range of international contexts, we will discuss contemporary issues related to well-being from a global perspective. Ideas on how to enhance well-being and further develop an inclusive society, including education systems, will be examined.
