For entrants in FY 2024

Appended Form 1

Specifications for Major Program

Name of School (Program) [School of Dentistry, Program of International Dentistry]

| Program name (Japanese) | 国際歯学プログラム |
|-------------------------|---|
| (English) | Degree Program in International Dentistry |

1. Degree to be obtained: Doctor of Dental Surgery

2. Outline

The School of Dentistry provides the "Program for International Dentistry" based on a foundational philosophy that aims to educate dental medical staff to acquire cross-disciplinary, general, creative, and international capabilities. To enable students to achieve the targets defined for this program, education is provided according to the contents described below:

- (1) Biodental education in the newly established academic framework that fuses life science and dental medicine and teaches the latest research methods, knowledge, and skills while respecting the existing academic frameworks of life science and dental medicine;
- (2) Education for developing dental medical staff who are able to collect and analyze required knowledge and information, update their thinking based on such knowledge and information in order to find comprehensive solutions to problems from a variety of points of view, and who possess a mindset that leads them to attempt to judge and act on their own responsibility and with deep humanity; and
- (3) Education that fosters expressiveness, comprehension, and a rich sensitivity for Japanese and foreign languages, and that develops capabilities for communication with and presentation to persons from different cultures and/or academic realms.
- 3. Diploma policies (degree conferment policy & program attainment goals)

The Program for International Dentistry will award a degree of Bachelor of Dentistry to students who, in addition to earning the required credits defined for the educational course, have acquired the capabilities described below:

- (1) Deep humanity, an understanding of the professional responsibilities of a dentist, and the fundamental knowledge, skills, and attitude required for putting such responsibilities into practice;
- (2) Recognition of the importance of research, as well as possession of a scientific intelligence and creativity;
- (3) The ability to think critically and solve problems, as well as the ability to study continuously throughout life;
- (4) The ability to communicate appropriately with patients, their families, and the other medical staff;
- (5) A capability for coping with change in society and progress in science related to dental medicine; and
- (6) The ability to deepen empathy and understanding toward different cultures and scientific realms, as well as a capability for convincingly representing personal opinions in an international society.
- 4. Curriculum policies (policies for organizing & providing curricula)

To enable students to achieve the targets that are defined for the Program for International Dentistry, the educational courses are organized and executed according to the following policies:

- (1) The liberal arts subjects are provided to enable students to establish the academic foundation required for the specialized education, acquire academic and general knowledge, methodology, and points of view, and develop a deep humanity based on a wide-ranging intelligence and the normative consciousness required for medical staff.
- (2) Students are allowed to improve their basic English ability by taking foreign language subjects in the liberal arts education. In addition to this, they join specialized educational subjects that are provided in both Japanese and English (Dual Linguistic Education), and study with students on the International Dental Course and short-term international students, in order to enhance their empathy and understanding toward the cultures of various countries and improve their international communication abilities.
- (3) The specialized education subjects provide biodental education for practicing dental medicine based on life science in order to enable students to acquire the basic knowledge and skills in life science and the specialized knowledge and basic clinical skills required for dentists; to enhance their understanding of scientific literacy, research ethics, and medical ethics; and to develop their scientific thinking abilities and creativity through practical dentistry research and education.
- (4) Students are encouraged to enhance their awareness as future dental practitioners through the practical clinical experience gained in early stages of the course, and to recognize both the importance of the establishment of good human relationships with patients, their families, and other medical staff and the diversity of needs in dental medicine. In addition to this, they acquire the perspectives, knowledge, skills, and attitude required to provide the high-quality dental medicine that citizens require and to take positions of responsibility in local society.
- (5) Integrated dental medicine education is provided for whole the educational course by introducing Problem-based Learning (PBL) and the other educational methodologies as self-leading study methods to enable students to develop the professionalism required for medical staff; improve their problem solving abilities, critical thinking, and ability for lifelong study; and acquire the capabilities required for dental medicine based on the holistic philosophy and general competence required in an international society.

The achievement in education is evaluated based on the result of the common achievement test (Computer Based Testing (CBT) / Objective Structured Clinical Examination(OSCE)), conducted before starting practical clinical exercises, and the result of the common achievement test (Post-Clinical Clerkship Performance examination(Post-CC Px)), conducted during practical clinical exercises, in addition to the grade scores for the subjects in the Program for International Dentistry and evaluation of the achievement level against the target defined for this program, in order to develop dentists with the superior capabilities that are required in society and by citizens.

- 5 . Start of the program / Admission conditionsFirst year (at the time of admission)
- 6. Qualification(s)

 Qualification for the National Board Dental Examination (obtainable on graduation)

7. Class subjects and class content

- * See the Table of Registration Standards on Attached Sheet 1-1 and 1-2 for your class subjects.
- * See the syllabus announced in each fiscal year for class content.

8. Academic achievements

At the end of each semester, evaluation criteria will be shown with a clear indication of attainment levels according to the evaluation items for academic achievements.

Students' learning outcomes from admission to the current semester will be indicated as one of three levels: "Excellent," "Very Good," and "Good," based on evaluation criteria calculated by adding the weighted values to numerically converted evaluations of their academic achievements (S = 4, A = 3, B = 2, and C = 1) in each subject being evaluated.

| Evaluation of academic | Converted |
|----------------------------|-----------|
| achievement | values |
| S (Excellent: 90 points or | 4 |
| higher) | 4 |
| A (Superior: 80 – 89 | 3 |
| points) | 3 |
| B (Good: 70 – 79 points) | 2 |
| C (Fair: 60 – 69 points) | 1 |

| Academic achievement | Evaluation |
|----------------------|-------------|
| Academic acmevement | criteria |
| Excellent | 3.00 - 4.00 |
| Very Good | 2.00 - 2.99 |
| Good | 1.00 – 1.99 |

Academic achievements based on the Program (detailed knowledge, skills, and attitude)

Knowledge & understanding

- 1. Knowledge & understanding of liberal arts including the humanities and natural sciences
- 2. Knowledge of the principles of medicine
- 3. Knowledge regarding basic and clinical dental medicine
- 4. Knowledge regarding related areas of medicine
- 5. Knowledge of life sciences
- 6. Knowledge & understanding of foreign languages and foreign cultures

OAbilities & skills

- 1. Basic skills for prevention, examination, inspection, diagnosis, and treatment of diseases in areas of dental medicine
- 2. Basic skills required for conducting experiments and presentations
- 3. Skills for appropriately collecting, selecting, organizing, and presenting information regarding life science and dental medicine

Comprehensive abilities

^{*} See the relationships between evaluation items and evaluation criteria on Attached Sheet 2.

^{*} See the relationships between evaluation items and class subjects on Attached Sheet 3.

^{*} See the Curriculum Map on Attached Sheet 4.

- 1. Rich humanity, understanding of professional responsibilities of a dentist, and general capabilities including basic knowledge, skills, and attitude required for putting such responsibilities into practice
- 2. Recognition of the importance of research, scientific intelligence, and creativity
- 3. Ability to think critically, solve problems, and engage in lifelong learning
- 4. Skills for appropriately communicating with patients, their families, and other medical staff
- 5. Ability for coping with change in society and progress in science related to dental medicine
- 6. Capabilities for coexisting and cooperating with persons from various cultures and regions, and for international communication
- 9. Graduation thesis (graduation research) (placement and method & time of assignment) Students are not required to prepare a graduation theses.

10. Responsibility system

The dean room council and the faculty council of the School of Dentistry are engaged in planning for and execution of this course. For the processes of evaluation and action for improvement, the dean of the School of Dentistry consults with the dean room council and the faculty council of the School of Dentistry, and carries out the required actions while taking the results of the consultations into consideration.

Note 1 : Semesters marked with O are the standard semesters for taking related subjects. If you failed to obtain the credit(s) in said semester, you may take the subject again in later semesters. Since the semester in which the subject is actually provided may be changed, you should confirm the accurate semesters by the relevant documents such as annual class tables for Liberal Arts Education.

Note 2: If you have obtained more than the required credits by taking the classes of Area Courses and Social Cooperation subjects which the Language of Instructions are [E: English] on Syllabus, you can substitute for English credits (6 credits) necessary for graduation. For details, see the items related to Liberal Arts Education in the Hand book for Students.

substitute for English credits (6 credits) necessary for graduation. For details, see the items related to Liberal Arts Education in the Hand book for Students.

Note 3: You can substitute the credits which you have obtained by taking the "Online English Seminar I & II" based on self-learning for English credits (6 credits) necessary for graduation. Also, there is a Credit Transfer System based on foreign language proficiency tests and language training. For details, see the items related to English in Liberal Arts Education and "Handling of Credit Accreditation Based on Foreign Language Proficiency Tests, etc." in the Hand book for Students.

Note 4: There is a Credit Transfer System based on foreign language proficiency tests. For details, see the items related to English in Liberal Arts Education in the Hand book for Students

Note 5: When failing to earn the credit for 'Introduction to Information and Data Sciences" is it allowed to take the subject from courses in Information and Data Sciences Subjects.

Note 6: Students who did not take the subject "Physics" in the Common Test for University Admissions are required to take the subject "Foundation physics for life science."

Note 7: Students who did not take the subject "Biology" in the Common Test for University Admissions are required to take the subject "Foundation biology for life science."

Academic achievements of Degree Program in International Dentistr

Relationships between the evaluation items and evaluation criteria

| | | Academic achievements | | Evaluation criteria | |
|-----------------------------|-----|--|--|---|--|
| | | Evaluation items | Excellent | Very Good | Good |
| | (1) | Knowledge & understanding of liberal arts including the humanities and natural sciences | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| ınding | (2) | Knowledge of the principles of medicine | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| Knowledge and Understanding | (3) | Knowledge regarding basic and clinical dental medicine | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| wledge and | (4) | Knowledge regarding related areas of medicine | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| Kno | (5) | Knowledge of life sciences | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| | (6) | Knowledge & understanding of foreign languages and foreign cultures | Being able to correctly explain all contents of each subject, and develop them deepening the learning. | Being able to correctly explain all contents of each subject. | Being able to explain almost all contents of each subject. |
| ls | | Basic skills for prevention, examination, inspection, diagnosis, and treatment of diseases in areas of dental medicine | To attend hands-on training and other exercises with basic knowledge which is learned ahead of time. Also, participate proactively in these activities, intending to further develop studies. In addition, with regard to reports, to be able to consider phenomenon objectively and to have the ability to objectively assess future tasks. | To attend hands-on training with good attitudes. Also, to further develop what students learn in the training based on principles. In addition, to be able to consider phenomena subjectively in reports. | To be able to develop what students learn in hands-on training. Also, to attend these activities with good attitudes. Also, to be able to describe phenomena subjectively. |
| Abilities and Skills | (2) | Basic skills required for conducting experiments and presentations | To attend hands-on training and other exercises with basic knowledge which is learned ahead of time. Also, participate proactively in these activities, intending to further develop studies. In addition, with regard to reports, to be able to consider phenomenon objectively and to have the ability to objectively assess future tasks. | To attend hands-on training with good attitudes. Also, to further develop what students learn in the training based on principles. In addition, to be able to consider phenomena subjectively in reports. | To be able to develop what students learn in hands-on training. Also, to attend these activities with good attitudes. Also, to be able to describe phenomena subjectively. |
| | (3) | Skills for appropriately collecting, selecting, organizing, and presenting information regarding life science and dental medicine | Has sufficient capabilities, and finding and studying by himself/herself problems that need to be solved. | Has capabilities. | |
| | (1) | Rich humanity, understanding of professional responsibilities of a dentist, and general capabilities including basic knowledge, skills, and attitude required for putting such responsibilities into practice | Has sufficient capabilities for providing appropriate medical care as a dentist under supervision of a clinical instructor, and finding and studying by himself/herself problems that need to be solved. | Has sufficient capabilities for providing appropriate medical care as a dentist under supervision of a clinical instructor. | Has capabilities for providing appropriate medical care as a dentist under supervision of a clinical instructor. |
| | | Recognition of the importance of research, scientific intelligence, and creativity | Is capable of finding a problem related to life science that needs to be solved, and solving it using scientific methodologies. | Is capable of finding a problem related to life science that needs to be solved, and sufficiently explaining its importance and the process needed to solve it using scientific methodology. | Is capable of finding a problem related to life science that needs to be solved, and explaining its importance and the process needed to solve it using scientific methodology. |
| Comprehensive Abilities | (3) | Ability to think critically, solve problems, and engage in lifelong learning | Is able to select and study an appropriate dental treatment by himself/herself based on scientific evidence. | Is able to sufficiently explain the importance and process of selecting and studying an appropriate dental treatment by himself/herself based on scientific evidence. | Is able to explain the importance and process of selecting and studying an appropriate dental treatment by himself/herself based on scientific evidence. |
| Compreher | (4) | Skills for appropriately communicating with patients, their families, and other medical staff | Is capable of holistically communicating in a dignified manner with a patient and his/her family, and collaborating with medical staff, to establish an appropriate relationship of trust as a dentist. | Is sufficiently capable of holistically communicating in a dignified manner with a patient and his/her family, and collaborating with medical staff. | Is capable of holistically communicating in a dignified manner with a patient and his/her family, and collaborating with medical staff. |
| | (5) | Ability for coping with change in society and progress in science related to dental medicine | Has wide-ranging intelligence and adaptability, and is able to cope with change in social conditions and innovation in medical technologies. | Has wide-ranging intelligence and adaptability, and is able to sufficiently explain the necessity of coping with change in social conditions and innovation in medical technologies. | Has wide-ranging intelligence and adaptability, and is able to explain the necessity of coping with change in social conditions and innovation in medical technologies. |
| | (6) | Capabilities for coexisting and cooperating with persons from various cultures and regions, and for international communication | Sufficiently understands and has empathy toward various cultures and regions, and is capable of convincingly representing his/her own opinion in an international society. | Understands and has empathy toward various cultures and regions, and is capable of convincingly representing his/her own opinion in an international society. | Understands and has empathy toward various cultures and regions, and is capable of taking part in an international society. |

Placement of the Liberal Arts Education in the Major Program

In this Program, students will create the academic foundation required for a specialized education, acquire knowledge through wide-ranging studies in the Humanities, Social Sciences, and Languages, and cultivate intellectual curiosity and the ability to take intelligent actions. They will develop the foundation as a medical expert, by acquiring communication skills and learning cooperation, the ability to collect information, and ideas on bioethics and dignity.
