指導的立場の教員氏名
松村幸彦
企画の目的及び内容
Generally, our objectives are: 1. To promote a good relationship among international students in Hiroshima University through activities toward engineering perspectives. 2. To be a center of cultural exchange and international cooperation not only among international students but also between Japanese students in Hiroshima university as well as Japanese local residences in Hiroshima area. This year, we organized "Cycling tour" in Oasa, Kitahiroshima town. The objective is first, the cultural exchange with local Japanese in Hiroshima. Second, it is to find out the problems when cycling there and then to come up with some ideas to solve the problems regarding the cycling.
来場者数
10 students from Hiroshima University, 5 people from Kita-Hiroshima
主催・後援団体 (外部のコンテスト等に参加する場合は, そのコンテストの規模)
共催団体: NPO 法人 INE OASA (http://www.e-jyan.jp/)
活動の内容 (準備, 広報活動, 当日の様子等)

Cycling trip

1. Discuss with INE OASA about the cycling route and the bicycle: We made an agreement with INE OASA to let our members use the bicycles that were unused bicycle brought from Hiroshima University so that our members would realize what can be applied to the bicycle to make them more efficient for use in the area.
2. Create a cycling route and activities during the cycling to interact with local people: the route for this trip was created to make our members riding on every conditions of the roads in that area. Activities during the cycling were also included so that our members can learn Japanese culture at the same time.
3. Have the members experience cycling in Oasa: after the cycling trip, we discussed about what are weak points of bicycles to be used here. Some members found that the problem here is a steep road. So it would be better if motors can be attached to help mobilizing the bicycles. Unfortunately, we did not have enough budget to purchase the equipment. This modification project will be proposed in the next fiscal year.
4. Have the members write about their experience in the cycling trip: their impressions about experiencing in rural area and interaction with local Japanese people there are uploaded to our club website.

Cycling map

1. The cycling map was initiated previously when some of our members were doing the project in this area. It was developed and completed by our club members after experiencing cycling trip.
2. The map was printed under the name of Hiroshima University. The printed maps are being distributed at the Hiroshima travel center, Hiroshima rental cycle hubs, Chiyoda michi no eki.
3. The map is also being uploaded on the club website.

Subaragoi club website (<http://home.hiroshima-u.ac.jp/subaragoi/>)

1. We are also trying to promote our club activities through social media. First is to introduce our club. Second is to report about our activities.
2. After discussing about the club promotion, the club website was created and designed by our club member.
3. The articles on the club websites were written by our club members.

アンケートの結果 (来場者にアンケートを実施した場合のみ)

-

成果・課題

1. The cycling trip was successfully held on Nov. 26. The members could try riding on the bicycles that is the reused bicycle from Hiroshima University. Since the bicycles were not fully in good conditions, members were facing some difficulties riding on them. After the rides, all the member discussed about how to improve and develop the bicycles in the futures toward engineering perspectives.
2. The members and local Japanese people could interact with each other through some cultural exchanges. The activities were reported on our club website.
3. Map developed during this fiscal year is printed and distribute. This result shows that our club is contributing to the Japanese society as well by letting people outside know more about the rural area and that they can come and rent bicycle to explore the area.
4. Club website is being developed and used for introduction of our club and what we do.
