

## The Joint Degree Program

◆ The Joint Degree program can provide distinctive intellectual training for students, through developing a curriculum shared by Hiroshima University (HU) and the partner university, by means of academic supervision involving close collaboration with faculty members from both HU and the partner university.

In addition, from following the two-year curriculum, including study abroad for one year, students can develop a broad perspective, multi-view thinking and skills, to cope with various issues, through joint collaboration with other students who have different cultures and various backgrounds.

Our program offers a two-year master's course in collaboration with the University of Graz (UG) and students study at both HU and UG for one year each. Graduates are awarded a Master's degree (Master of Science), which is jointly awarded by both universities.
