

For Those Who Will Receive the Electronic Certificate (PDF)

(For persons in charge at companies, educational institutions, research organizations, and other entities)

Online Delivery of Electronic Certificates (PDF)

This service allows you to send a download link for an electronic certificate (PDF) directly to prospective employers, overseas educational institutions, and research organizations. Online certificates are issued with a timestamp and an electronic signature, ensuring authenticity. Additionally, if the certificate is tampered with after issuance, an error message will be displayed when the PDF is opened.

Anti-counterfeiting with POPITA® (Digital Watermarking)

Various certificates issued by our university through convenience stores and the online delivery function of electronic certificates (PDF) are equipped with digital watermarks (anti-counterfeiting via POPITA®), allowing verification of their authenticity. They cannot be copied for use.

* POPITA® is not a registered trademark of NTT Advance Technology Corporation.

The Process of Sending Electronic Certificates Online

- ❶ The applicant will verify whether your company supports the online delivery of electronic certificates. If supported, please provide the applicant with the following information.
 - Name of the company, educational institution, or research organization (printed on the certificate)
 - Department name
 - Name of the person responsible in charge
 - E-mail address for delivery
- ❷ After the applicant submits their request through the certificate issuance service, a download link for the electronic certificate will be sent to the email address provided in ❶.
The validity period of the download link is three months from the certificate application.
- ❸ Please download the electronic certificate from the provided download link. For instruction on how to obtain the certificate and verify its authenticity. Please refer to the [Certificate Issuance Service Operating Manual \(For Companies\)](#)
