Doctoral Thesis Presentation

Study on the dynamics of IL-1ra during the progression of mastitis in goat mammary gland

ヤギ乳房の炎症過程におけるIL-1raの動態に関する研究

Presenter (演者): Nur Laili Marufah

Program of Bioresource Science (生物資源科学プログラム)

IL-1ra is an anti-inflammatory cytokine which inhibit the pro-inflammatory effects and influence the severity of mastitis (udder inflammation). However, information on IL-1ra production and changes during mastitis process remains limited. The study aims to elucidate the dynamics of IL-1ra production in ruminant mammary gland using mastitic goat model.

Time	: August 18 th 2025 (Mon), 15.00-16.00
日時	: 2025年8月18日 (月), 15.00-16.00
Location	: School of Applied Biological Science, C203
場所	: 生物生産学部, C203

This presentation recognized as science seminar of Graduate School of Integrated Sciences for Life
統合生命科学研究科の共同セミナーとして認定されます
