## **Project for Developing and Supporting the Next-Generation AI Researchers at Hiroshima University, Application Guideline (Support Starting from April 2026 and October 2026)**

Hiroshima University has been selected as an implementing institution for "Program for Developing the Next-Generation AI Researchers" proceeded by the Japan Science and Technology Agency (JST). Hiroshima University has established the Program for Developing and Supporting the Next-Generation AI Researchers at Hiroshima University with the aim of creating an environment where doctoral students acting well in the field of AI can concentrate on their research with peace of mind, and making them leap forward by support and foster so that they can contribute to the realization of Japan's target of future society (Society 5.0) due to overcoming social problems by AI technology expected further development in near future. Therefore, we are calling for students who are eligible for support (hereinafter referred to as "Next-Generation AI Fellows").

The aim of this program is not to utilize conventional AI technology just for research but to call for resources who can contribute to realization of Society5.0 with innovation to solve social problems through development of AI and original proposals to utilize AI as a technology which is foundation of Society5.0.

Next-Generation AI Fellows to be adopted need to belong to laboratory of AI division in "Education and Research Center for Artificial Intelligence and Data Innovation at Hiroshima University" (hereinafter referred to as "AIDI Center"). The system of academic supervisor in this program consists of two supervisors that one is in the laboratory of research institute at doctoral course and another is in AI division of the AIDI Center. Therefore, the content of research for applicant has to match the research fields of the AIDI Center.

➔ Refer to below Home Page as for the research fields of AI division in the AIDI Center.  
<https://aidi.hiroshima-u.ac.jp/department/ai/> (only available in Japanese)

And as following obligations affecting academic supervisors of laboratory are essential to be executed, in-depth consultation with the academic supervisors is required for application.

- Frequent three-cornered discussion among Next-Generation AI Fellow and two academic supervisors.
- Participation in the presentation held by AIDI Center to confirm the progress of research.
- Conference presentations and papers on AI research during the period of support for Next-Generation AI Fellow.

The program will provide to adopted Next-Generation AI fellows the support grant which is an amount equivalent to living expense to devote their research as well as research funds. Besides it will implement the various initiatives related to their career development and raising, and the acquisition of transferable skills.

In addition, HU SPRING, an emergent scene for Next-Generation AI Fellows to interact and collaborate beyond their own areas of expertise, will be established to provide a forum for discussion on how to approach solving social problems and achieving world peace.

## 1. Number of Students to be Accepted

Graduate School	Course	Major Subject	Program	Eligible Students	The number of Fellows to be selected at this time
All the Graduate Schools of Hiroshima University	Doctoral Courses or 4-Year PhD Programs	All Major Subjects	All Programs	• Doctoral course students or four-year doctoral course students enrolling in Apr. 2026 or Oct.2026.	<b>Support Starting from Apr.2026 or Oct.2026</b>  A few people

## 2. Eligibility

The following (1) to (4) are the descriptions of the eligibility requirements applicable to this program.

- (1) Applicants must be enrolled in a doctoral or four-year doctoral course at Hiroshima University at the start of support and match the above “eligible students”.  
\*A student taking a leave of absence due to childbirth, childcare, illness, study abroad, etc. will be determined separately in consideration of individual circumstances.
- (2) Applicants must NOT receive an income that exceeds 2.4 million JPY for the period from January to December of the year in which the support starts. (However, receiving a salary of working part-time job such as a TA or RA does not preclude the eligibility requirements.)
- (3) At the start of the support, applicants must NOT be supported by the following fellowships or scholarships:
  - Research Fellowship for Young Scientists from the Japan Society for the Promotion of Science (including those JSPS has unofficially selected).
  - Japanese Government (MEXT) Scholarships for international students.
  - Any scholarship/s from the home countries of international students.
- (4) Applicants must NOT be receiving or applying for scholarships from local governments, private organizations, or other entities that overlap with this project's support period and prohibit concurrent receipt with other scholarships.
  - [Note]: Concurrent applications for the "Program for Developing and Supporting the Next-Generation of Innovative Researchers at Hiroshima University" or "Hiroshima University Global Doctoral Fellowship" which is separately accepting applications are acceptable. If selected for both programs, priority will be given to the "Project for Developing and Supporting the Next-Generation AI Researchers at Hiroshima University". Applicants will not be selected for both programs at the same time.

## 3. Application Method

Please access the online application form (Google Forms) from the following URL, enter the required items, and submit it. The applicant's Google account details and password authentication are required for access.

**\*After the applicant information session in December 10 and 12, the application submission period will be from Monday, December 15, 9:00 to Monday, January 5, 17:00 (Japan Standard time). For more information about the information session, please [click here](#).**

**<Online Application Form>: [Google Form](#)**

**[Applications can be submitted from 9:00 a.m. on Monday, December 15.]**

**\*Form submission requires authentication with your Google Account and password. If a login screen appears, please enter your personal Gmail address. (※This is NOT your Hiroshima University email address)**

**\*Please be sure to upload your application documents in PDF format.**

**\*The application documents may be either in color or black-and-white.**

\*The application documents must be filled-out and submitted according to the program's specified format without modification. If you apply using documents which are different from the specified format, your application may not be screened.

\*The "Check Sheet" for the application form must also be completed and submitted. Incomplete check sheets may result in the application not being considered.

\*In principle, revision of application documents after submission is not allowed. Please make sure that there are no errors in the documents you submit before submitting them.

\*Please have your faculty advisor sign and seal the "Recommendation and Consent Form" in the application form and submit a scanned copy of the form as data.

\*If you have difficulty applying through the online application form, please contact us by email and include in the message the reason why you are unable to use the form.

<Proself> (Cloud for submitting video)

<https://share.huc.hiroshima-u.ac.jp/public/6nZpghlO74SJmhU2G1TV9bN-BvQMHkjClmcQBivbxJKu>

\*Be sure to upload videos saved in MP4 (.mp4) format.

\*The file name must be "Applicant's full name". (Example: HIRODAI Taro.mp4)

\*The volume of video needs up to 10 minutes and has to include following items.

1. Abstract of research (the content of research so far, and research plan in doctoral course)

2. How to contribute to realization of Society5.0 with innovation to solve social problems through development of AI and original proposals to utilize AI.

\*The video content should be composed in an easy-to-understand manner, such as using PowerPoint, etc.

\*The video should be filmed in a way that the applicant can be seen and heard, with an explanation in either Japanese or English. (Please do not use mechanical sound.)

#### 4. Application Deadline

**January 5th (Monday), 2025, 17:00 (Japan Standard Time)**

\*Applications received after the deadline will not be accepted for any reason. Please plan ahead and anticipate the time it will take to prepare your application documents and fill out the application form.

\*When the deadline approaches, we may receive many inquiries and need additional time to respond. Please prepare your application materials systematically and contact us as soon as possible if you have any questions.

\* Frequently asked questions are listed below, so please check here first before contacting us.

<[FAQ](#)>

\*The university will be closed from December 27(Sat.) to January 4(Sun.). Please note that we will not be able to respond to inquiries.

#### 5. Selection Process and Notification of Results

The screening is implemented based on the application document and the video. Adoption is determined according to the consultation of the AI Talent Review Committee which consists of researchers of the AIDI Center and external experts.

All applicants will be notified of the screening results by e-mail during March, 2026. (Please note that applicants who were initially unsuccessful in their application may be selected at a later date, depending on the status of adoption. In such a case, we will contact you by e-mail separately.)

In addition, regarding the evaluation of each applicant, an emphasis is placed on the applicant's capability to "contribute to realization of Society5.0 with innovation to solve social problems through developing and utilizing AI".

Please note that individual inquiries regarding each decision will not be able to be responded to.

**The adopted applicant will be checked for similarities with previous applications, etc., and if any irregularities are found, the adoption of the application will be cancelled.**

#### 6. Outline and Important Notes Regarding Support after Selection

(1) For further Support details, please refer to the attached "Outline of Support by the Project for Developing and Supporting the Next-Generation AI Researchers at Hiroshima University".

- (2) **You must enroll at Hiroshima University to be officially selected. Check the requirements with your desired graduate school or department and complete the admission or advancement process.**
- (3) If the enrollment period is postponed, the selection will be canceled. You will need to reapply according to the new enrollment period.
- (4) After enrollment, guidance materials will be shared on Hiroshima University's online learning support system (Moodle). Please make sure to check them.

## **7. Contact Information**

Next Generation AI Fellowship Application Office (Global Career Design Center)

E-mail: [fellowship@office.hiroshima-u.ac.jp](mailto:fellowship@office.hiroshima-u.ac.jp)

※Please send inquiries by e-mail.

## **<Outline of Support by the Project for Developing and Supporting the Next-Generation AI Researchers at Hiroshima University>**

### **1. Support to Next-Generation AI Fellows**

(1) In order to support the Next-Generation AI Fellows and allow them to concentrate on their studies and/or research, stipends will be provided for up to three years (or four years for doctoral students of the 4-Year Ph.D. Programs) after their enrollment\*. Based on the principle monthly amount of 250,000 JPY, two months' worth of payments will be provided in May, July, September, November, January, and March.

The detailed schedule of payment will be announced after adoption.

\* If a Next-Generation AI Fellow's tenure exceeds the standard study period, the support will be discontinued. However, if it becomes necessary for a Next-Generation AI Fellow to suspend or extend the period of support due to childbirth, childcare, illness, studying abroad, etc., the individual's particular circumstances will be considered before a decision is made.

(2) The stipends are taxable as a miscellaneous income. Therefore, every Next-Generation AI Fellow is required to file an income tax return.

Furthermore, if a student with dependents (parents, etc.) is provided with a Next-Generation AI Fellowship, they may need to be excluded from their dependents. Therefore, if a student is selected as a Next-Generation AI Fellow, they should inform their dependents (parents, etc.) that the stipends they receive will be treated as a miscellaneous income under the Japanese tax law. For the procedures required to change your health insurance or dependents, please contact the person in charge at the workplace of your dependents (parents, etc.).

(3) For a period of up to three years (or four years for doctoral students of the 4-Year Ph.D. Programs) after a Next-Generation AI Fellow's enrollment, research funds of up to 900,000 JPY per year will be funded from the academic year in which they have been selected as a Next-Generation AI Fellow. And the maximum amount of research expenses for a fiscal year in which the period of support is six months or less is 450,000 JPY.

(4) For international students who are unable to commute to the campus on the first day of the month in which they start receiving support, support will begin in the month following the day they are able to commute to the campus (or the same month if that day is the first day of the month). Additionally, after support begins, the stipends will not be provided for any month during which the student is entirely absent from Japan for personal reasons unrelated to study or research.

### **2. Next-Generation AI Fellow Obligations**

Next-Generation AI Fellows shall fulfill the following obligations to receive support:

- (1) Develop a yearly research plan for each academic year and concentrate on research activities based on the plan.
- (2) Participate in programs offered by the University related to improving research capabilities.
- (3) Report the progress of research activities to the University regularly.
- (4) Cooperate in various surveys. In particular, it is essential to cooperate with follow-up surveys on your career for 10 years after completion of the program.
- (5) Based upon the “広島大学における研究活動に係る研究倫理教育に関する細則” (only available in Japanese; provisional translation: “Detailed Rules Concerning Research Ethics Education Related to Research Activities at Hiroshima University”), make sure to undertake necessary research ethics education.
- (6) Participate in the initiatives, activities, etc. which are carried out by the “HU SPRING” or are disseminated on the "HIRAKU-PF" for career development of the Next-Generation AI Fellows. In particular, you should participate actively in the "HU SPRING 3QUESTIONS" and the "HIRAKU 3MT Competition".
- (7) Register an account with the Cooperative Education through Research Internships program.
- (8) To proceed the research with maintaining the balance between the applicant's expertise and the development and application of AI under the guidance of two supervisors that one is in the laboratory of research institute at doctoral course and another is in AI division of the AIDI Center.
- (9) To participate in the presentation held by AIDI Center to confirm the progress of research
- (10) Conference presentations and submitting papers on AI research during the period of support for Next-Generation AI Fellow

### **3. Next-Generation AI Fellowship Cancellation**

If a Next-Generation AI Fellow falls under any of the following cases, the Next-Generation AI Fellow will be withdrawn, and the provision of stipends and research funds shall be discontinued:

- (1) The Fellow's annual income, from January to December, exceeds a certain amount (2.4 million JPY or more per year). Note that this annual income refers to stable incomes, such as standard salaries/remunerations, and does not include income received from paid internships, RA/TA, part-time work, etc.
- (2) The Fellow receives a Research Fellowship for Young Scientists from the Japan Society for the Promotion of Science, a Japanese Government (MEXT) Scholarship for international students, or any other scholarship/s from their home country.
- (3) The Fellow's research plan progress and/or the fulfillment of the Next-Generation AI Fellow Obligations is deemed insufficient.
- (4) The Fellow requests to cancel their Fellowship.
- (5) The Fellow takes a leave of absence from the University. However, in the case of childbirth, childcare, illness, studying abroad, and other such factors, the individual's particular circumstances will be considered before a decision is made on the suspension and subsequent resumption of payments.
- (6) The Fellow withdraws from, or is removed from the University.
- (7) The Fellow does not meet the original eligibility requirements. (In this case, full-repayment of stipends and research funds is claimed.)
- (8) The University decides that there is a valid reason to cancel the Fellowship.

#### **4. Repayment of Excess Stipend Payments and Research Funds**

If the period of support is shortened due to early completion, cancellation of support, etc., the payment of the stipends will be stopped at the end of the shortened support period, and any excess amount which has been paid will need to be returned. Also, in principle, the research funds will also need to be returned in proportion to the number of months the support period was shortened by.

#### **5. Others Notes**

- (1) As long as it does not interfere with a Fellow's research activities, it is possible to receive a salary via a RA/TA position, etc., or work part-time.
- (2) The names of those who are selected as Next-Generation AI Fellows will be published on the University's website.
- (3) Any personal information stated within the application documents, and any other necessary personal information provided by the graduate school to which an applicant belongs to, will be used only for the purposes of the selection of candidates, preparation for acceptance, education/research guidance, etc.
