II. Liberal Arts Education Course Registration Procedures

1. Important Notes

- (1) Some schools set the maximum number of credits that can be registered for per semester. Please note that, depending on the school, the maximum number of credits include courses that students register for without seeking credits.
- (2) Unless instructed otherwise, carry out course registration procedures on My MOMIJI. **Writing your name on an attendance sheet in your class do not complete your course registration.**
Please carefully check notes and functions on My MOMIJI in the user's guide which is linked to the page that appears after logging in to My MOMIJI.
- (3) If you have made any mistake in the process of registering for courses, the content of the error will be displayed on the screen and you will be prevented from registering for such courses.
If you cannot complete course registration for some unknown reason, inquire at the Liberal Arts Education Section of the Education Promotion Group (1st floor, Administration Building, School of Integrated Arts and Sciences) within the course registration period.
- (4) Each course sets an enrollment limit. As a general rule, the enrollment limit is equal to the capacity of a classroom in which the course is taught. However, in order to ensure smooth class lessons and term-end examinations, the actual enrollment limit may be made smaller than the classroom capacity. The enrollment limit of courses taught in a big lecture room accommodating more than 250 persons will be 250 as a general rule. (Please check the bulletin board for details on the enrollment limit.) If the number of applicants for a course exceeds its enrollment limit, enrollees will be chosen by computerized random draw. Therefore, when drafting your class timetable, you need to plan what to do if you are not selected in the drawing. Note that, depending on the drawing result, you may be restricted from course registration procedures as shown below during the confirmation and revision period (See "2. Course registration periods").
<If you are selected in the computerized random draw and are enrolled>
If you are enrolled in a course as a result of being selected in the computerized random draw, you will not be allowed to cancel your registration without any special reason. If there is any such special reason and you wish to cancel your registration, notify the Liberal Arts Education Section of the Education Promotion Group during the course registration period.
<If you are not selected in the computerized random draw>
If you are not selected in the computerized random draw, you may register for another course for that class hour. In this case, courses you may register for are only those that do not choose enrollees by lot and have not reached their enrollment limit. Also, note that the course registration procedures for such courses will be carried out on a first-come-first-served basis.
- (5) If you do not need to enroll in any particular course for such a reason as approval of previously acquired credits, notify the Liberal Arts Education Section of the Education Promotion Group.
- (6) During the confirmation and revision period, check for yourself that all the courses you have registered for have been duly registered for. **For the courses that have not been registered for because you have failed to do the necessary checking, you will not be able to acquire credits even if you attend all classes and take term-end examinations.**
