

The 281st IDEC Asia Seminar

Development and Environment: Concerns in India's Energy

Economic growth requires energy and coal is the most critical resource fueling growth for Indian economy. Expanding extraction of coal requires mining in dense natural forest reserves which under the environmental policy have been identified as “No Go” forest areas. This presentation attempts to estimate GDP generating potential as the benefit of the coal reserves falling under an identified ‘No Go’ forest zone.

Speaker: Dr. Pritee Sharma

Assistant Professor, School of Humanities & Social Sciences Indian Institute of Technology, Indore, India

Date & Time: 17:00 - 18:30, Thu, 4th Dec 2014
