JICA Support Program Outputs Will Be Disseminated
Nation-wide With Bangladesh Government Funds

教育文化講座 馬場 卓也

Educational Development and Cultural and Regional Studies

Baba, Takuya

2004年10月に広島大学が株式会社パデコと共同受託した JICA の技術協力プロジェクト「バングラデシュ国小学校理数科教育強化計画」は、初等教育現場における「教育の質の向上」をめざす取り組みです。本学 IDEC 教員も現地入りし、小学校教員および関係者への研修を通じて初等理数科授業を改善すべく試行錯誤してきました。そこでは、研修講師と現場教員の授業実践力向上、教員研修カリキュラム改善、教育パッケージ開発を活動の柱として現地関係者とともに汗を流してきました。

このうち教育パッケージ (TP) とは、算数と理科の2教科を対象とし、バングラデシュにおいて比較的難しいトピックを現場教員や生徒からの声をもとに選び、授業案や教材、評価シートをひとまとめにし、具体的に授業改善のためのヒントを提供しようというものです。バングラデシュの初等教育は5年制で、算数は全学年、理科は3年生以上で習います。これまで初等教育アカデミー (NAPE)の専門官らとともに、協力校教員からの使用に関する意見を取り入れながら、合計8種類 (算数と理科の全学年分)のTPを開発しました。

本プロジェクトは、11 の援助機関が参加する PEDPII と呼ばれる初等教育サブセクタープログラムの下で実施されており、第2コンポーネント(教室レベルにおける教育の質の改善)の中心的な活動となっています。2007 年 11 月にはその成果が PEDPII の中で優良案件として認められ、そのプログラムの全体資金(プールファンド)の一部を用いて全国の小学校や教員研修関係施設に配布されることが決まりました。手続きは進んでおり、2009 年 2 月には両教科最終稿(第5学年)の承認も得られて、現在、印刷・配布が進んでいるところです。

本プロジェクトの当初の協力期間は4年でしたが、PEDPIIの延長に伴い延長され、既に約5年が経過しました。政情不安や官僚主義などの問題を乗り越えて、このような全国レベルでの成果を挙げえたのは、関係各位の不断の努力と協力の賜物だと思います。プロジェクトの活動は現在6年次に入り、TPの全国配布を確認すると共に、それが定着するように、次なる一歩を準備しています。その戦略として有望なのが、地域の教育拠点である初等教員養成校 (PTI) です。

近い将来この TP を活用して教員が授業をし、子どもたちの学ぶ笑顔がみられるとき、本当の成果はそこからはじまるのだと思います。

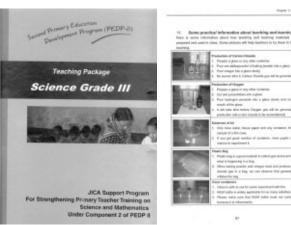

JICA's technical cooperation "Strengthening Primary Teacher Training on Science and Mathematics in Bangladesh" has been implemented jointly by IDEC, Hiroshima University and PADECO Co., Ltd. since October, 2004. This program aims at "Improvement of education quality" at the level of primary education. Graduate School for International Development and Cooperation, Hiroshima University has dispatched teaching staffs to Bangladesh as JICA experts to work together with local experts for this program. There are such major activities as improving teaching performance both at teacher training institutes and schools, improving teacher training curriculum, and developing Teaching Packages (TPs) .

Among these, TP means a compilation of lesson plans, teaching-learning materials, and evaluation sheets, etc. on the topics that teachers find difficult to teach in class in order to provide teachers with some hints for lesson improvement. In Bangladesh, primary education consists of five years in total, and mathematics is taught in all grades and science is taught from grade three to five. We have developed eight TPs (for all grades in science and mathematics) together with specialists of NAPE (National Academy for Primary Education) as well as FTS (Field Testing School) teachers.

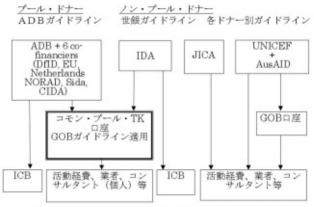

This project is under the framework of subsector program, PEDPII (Second Primary Education Development Program) supported by 11 developing partners, and it is the main activity of the second component (Quality improvement in schools and classrooms) of the program. Since TPs have received high recognition, PEDPII decided in November 2007 to distribute nationally TPs with the pool funds. Printing and distribution of TPs have been on progress after the final approval in February in 2009.

The original term of cooperation was for 4 years, but it was extended due to the extension of PEDPII itself and 5 years has already passed. We attribute this national-level achievement to all staff's ceaseless effort and cooperation, overcoming the difficulties of the complicated government administrational system. Now, we are in the 6th year of the project and preparing a next step to oversee nation-wide distribution of TPs and also its effective utilization. Its promising strategies are PTIs (Primary Teacher Training Institutes) , which are the regional educational center.

Hopefully, in near future the effective use of TPs makes students feel fulfillment, and the real success will start from there.

# G.ecbo/i-ECBO プログラム事前研修について

Pre-internship Training in G.ecbo/i-ECBO Program

G.ecbo プログラム拠点委員長 藤原 章正

Chairperson, G.ecbo Program Committee
Fuiiwara. Akimasa

G.ecbo プログラム拠点事務局 平田 和子

Secretariat, G.ecbo Executive Committee

Hirata, Kazuko

2005 年度に i-ECBO プログラムからスタートしたこの実践的教育プログラムも 4年目を迎えた。現在では G.ecbo プログラムとして複数の他研究科へも広がりを見せている。この間に、インターンシップの形態は、専門分野の研究に特化したものから、留学生の日本企業の現場経験の国内研修まで、多種多様となってきた。しかし、現場で必要とされる頑健さ、柔軟性、コミュニケーション能力、問題解決を図るデザイン能力、言い換えれば国際的に通用する人間力を身につけることを目的としていることに変わりはない。

限られた研修期間の中で最大限の成果を上げるために、以下の事前研修を行っている。

- ①専門分野の科目
- ②外国語教育研究センター (FLARE) による英語コース
- ③英語プレゼンテーション研修
- ④リスク管理セミナー

そのうち、③英語プレゼンテーション研修では、インターンシップ派遣前に計3回、設定されたテーマに従いPPTファイルを準備し、英語での発表・質疑応答を行うが、プログラムの先輩学生たちが、TA、RAとしてその指導補助にあたる点が特徴である。発表学生たちは、指導教員・担当助教や受入機関担当者からのアドバイスを受けながら発表に臨み、発表最終回では、インターン先での具体的な研修内容を披露する。発表の回が進むにつれ、インターンシップの事前準備が整っていくように構成されている。先輩学生のフォローアップ教育としても効果を発揮している。

④リスク管理セミナーは渡航前の学生を対象に、治安・マナー・健康などの幅広い視点から注意喚起するとともに、十分な事前準備をさせるためのセミナーである。2008 年度からは G.ecbo 学生のみならず、全学の学生を対象に実施している。

さらに、今年度から新たに事前・事後研修として「分野 横断型課題発見セミナー」を開設した。ケース・ライティ ングという手法により、インターンシップの活動を個人の 経験レベルに留めることなく、分野・文化横断的視野を身 につけるための機会とし、またその経験知を研究科内に蓄 積していくことを目的としている。

以上のような事前研修を終え、やっと学生たちはイン ターンシップに臨むこととなるが、受入機関へ提出するた めの英文履歴書や研修計画書を作成することも、事前に行う大切な作業である。自分をアピールする履歴書、論理的で説得力のある計画書の作成に関係教職員からの指導を仰ぎながら、推敲を重ねて準備する。

こうした骨太の事前研修を通し、学生たちは現場で少々の困難にぶつかっても何とか乗り越えていけるだけの力を養うこととなる。身につけた力を総動員してインターンシップをやり遂げ、成長していく学生たちの姿は文字通り輝いている。

Started as i-ECBO program in AY2005, this practical education program has entered its 4th year, and now has been spreading to other graduate schools as G.ecbo program. In this course, the types of internship have got diversified from research-oriented ones to domestic firsthand-experience-oriented ones offered domestically for international students. However, its main objective still remains the same; that is to obtain enough strength, flexibility, communication skills, and designing ability to find an optimal solution, in one word, human capacity to be able to act positively in an international society.

In order for intern students to achieve their desired goal within a limited time of internship, the following pre-internship trainings and education are offered to them.

- ① Courses in students' specialization
- ② English courses in Institute for Foreign Language Research and Education (FLARE)
- 3 English presentation training
- 4 Risk management seminar

Among the four, in the ③ English presentation training, the participants are required to prepare ppt slides with 3 given themes and make presentation on each in English. It is carried out with dedicated assistance from senior program students as teaching assistants (TA) and research assistants (RA). In the final presentation, they are to introduce their concrete internship plan to the audience, for which they need to ask beforehand for advice and comments from the host institution, supervisors and teaching staff in their field. Thus the training itself is structured so that the students can manage to make good preparation before their internship as it goes on. It also works effectively as a follow-up education for senior program students.

④ Risk management seminar is carried out to awaken attention of the internship students from various viewpoints, such as overseas public security, manners to be avoided and health management. It has been offered for not only G.ecbo program students but for all university students since AY2008.

Furthermore, the program has newly started to offer 'interdisciplinary problem mining seminar' this semester.

It aims, by the method of case writing, at developing students' capacity to crystallize experiences and matters obtained during internship into issues to be inquired with their specialization, and also at accumulating the knowledge obtained through their experiences in our graduate school.

After going through all these preparatory training, the students will finally be dispatched to their host institute. However they still have another important preparatory task to do: to draw up English curriculum vitae (CV) and internship proposal. They beat their brains for making appealing CVs and rational and persuasive proposals with help and advice from their supervisors and the program staff.

Through such tough trainings, they are supposed to obtain enough capability to come over the difficulties they might face in their dispatched sites. When they complete their internship activities with all what they have obtained through the training, their faces radiantly shine with confidence.

#### 研究室訪問

**Laboratory Series** 

#### 篠田ゼミの紹介

Brief profile of Shinoda's seminar

平和共生講座 篠田 英朗

Peace and Coexistence Shinoda, Hideaki

私たちの研究室では、紛争による災禍を被った国家における、平和を構築するための活動に焦点を当て、シエラレオネなど、実際に紛争を経験した国からの留学生達を含む、修士4名、博士7名の学生達と共に、日々精力的に研究活動に邁進しています。

平和構築の対象分野は幅広く、それに応じて学生達の問題関心も、小型武器の回収、警察支援、司法領域の支援から、各国家が抱える個別の問題にまで及んでおり、週1回行われるゼミでは、それぞれの多様な視点から様々な問題の分析・議論を行っています。

週1回のゼミ以外にも、学生達の関心に応じて、該当する分野のエキスパートや先駆的な研究を行っている人々を広島に招き、特別な研究会を開催することや、研究室内で互いの修士・博士論文についての報告を聴く機会を設けるなど、活発に活動しています。本年度は、とりわけ国連等でも大きな議題として挙がっているアフリカにおける平和構築活動について、積極的に取り上げて行こうと考えています。

We are actively researching on peacebuilding activities in post-conflict societies with 4 master's course students and 7 doctoral course students that include students from the countries faced with conflicts.

The field of the research subject of peacebuilding

covers a wide range of sectors. Students' research interests ranges from small arms problem, policing, justice sector issues to each countries' regional issues in accordance with the diversity of subjects. Our discussion on the matters of peacebuilding in weekly meetings is based on diversity of perspectives of each member.

In addition, we sometimes hold a special seminar by inviting experts or researchers who are engaged in pioneering works in the field of peacebuilding. Besides this, all members have opportunities to make presentations about own research and thesis. This year, we are especially studying peacebuilding activities in Africa that have been recently discussed as a major problem by many organizations including the United Nations.

篠田ゼミ

#### 同窓生便り

Letter from a member of Alumni Association

Name: Sudarmanto Budi Nugroho

(Graduated from Division of Development Science in September 2007)

I came to Saijo in October 2004 as Doctoral Course student in IDEC-HU under COE (Center of Excellent) Program, Social Capacity Development for Environmental Management. Before coming to Japan, I lived in Jakarta-Indonesia for 6 years and because of that, at that time, I am very surprised that saijo/higashi hiroshima far away from my imagination about the Japanese city. Fortunately, we live and study in International Community and we did many cultural activities together with other students from many countries. So, it was very helpful to support my life

and my study in a new place and new society. After graduated from Hiroshima University in September 2007, I went back to my home country and working as university staff for a while before moving as government officer. During stay in Indonesia, I always update the information about IDEC by emailing my supervisor, received alumni newsletter and also visited our Hiroshima University and IDEC website. In June 2008, I saw an opportunity to be an assistant professor of Global Environmental Leadership (GEL) Program in IDEC website. After several discussions with my family, my boss and my supervisor, I decided to apply this position. Surprisingly, I got the position and I am very happy to come back again to IDEC as assistant professor started from October 2008. GELs have several programs which especially proposed to strengthen and expand the network of IDEC alumni for low carbon issues in around the world. We invite our alumni to share and learn together in order to establish and increase the capacity as a new leader of the low carbon society in their home country. We have a lot of chances to improve our research, sharing ideas and phenomena and also increase educational ability especially in the context of global low carbon society which will be very useful for our future career.

# IDEC アジアセミナー要旨

Report on IDEC Asia Seminars

## The 164th IDEC Asia Seminar

#### 講師 Speaker:

Dr. Alimuddin HAMZAH (Lecturer, Center for Environmental Studies, Hasanuddin University, Indonesia)

#### 演題 Title:

Solid Waste Management in Mamminasata, Metropolitan of Makassar, Indonesia

#### 日時 Date: November 22, 2008

The speaker is a lecturer in UNHAS (University of Hasanuddin) whose main research subject is environmental management. He works in JICA Project of Metropolitan MAMINASATA Waste Management, the biggest solid waste management in Sulawesi Island. Outline of the project was introduced and solid waste management problem in Makassal Metropolitan was discussed together with other countries cases. Environmental assessment for solid waste treatment was intensively discussed after the lecture. We concluded

that UNHAS and IDEC-HU will collaborate in research and education on environmental assessment technology, especially in the Global Environmental Leaders program. (Coordinator: Takao Yamashita)

#### The 165th IDEC Asia Seminar

#### 講師 Speaker:

Diana Petkova (Associate Professor, Faculty of Journalism and Mass Communication, Sophia University, Bulgaria)

#### 演題 Title:

National Identity in the Process of Globalization

#### 日時 Date: January 21, 2009

Following the examination of the nature of globalization, Dr. Petkova examined the impact of the globalization process on the national identity, mainly of European nations. She pointed out three possibilities. First, it may fail and be replaced by other kind of identity such as global cultural identity, ethnic identity. Secondly, national identity will remain, though through a kind of rediscovery and rebirth. Thirdly national identity will become one of multiple identities. European identity alongside with the national identity may be one such possibility, though the current data on Bulgaria does not show much progress in this direction. (Coordinator: Masatsugu Matsuo)

#### The 166th IDEC Asia Seminar

## 講師 Speaker:

1) Prof. Nobutaka Miyahara (Professor, Faculty of Literature, Kurume University), 2) Ms. Miwa Kato (Programme Management Officer, Division for Treaty Affairs, United Nations Office on Drugs & Crime (UNODC)), 3) Dr. Masaki Kudo (Deputy Assistant Director, Central Asia and the Caucasus Division, Japan International Cooperation Agency (JICA)), 4) Mr. Fukuro Kakizawa (Former Staff of Fuji General Co. Ltd.)

#### 演題 Title:

PART 1 1) "Human Security" and Nation Building in Afghanistan, 2) Impact of illicit drugs on the Afghan peacebuilding process and the establishment of the rule of law

PART 2 3) Security Sector Reform in Afghanistan, 4) The current security situation of Afghanistan

#### 日時 Date: January 27, 2009

This seminar was held with four speakers and two discussants on "Current Challenges for Peacebuilding in Afghanistan." This seminar had two parts. The first one was entitled "Afghanistan, Drug and Peacebuilding," and the other one was "Enhancing Security in Afghanistan." In PART 1, Prof. Miyahara mentioned the

importance of human security in Afghanistan and Ms. Kato presented the special relevance of illicit drugs in Afghan peacebuilding. In PART 2, Dr. Kudo and Mr. Kakizawa presented current security in Afghanistan. The participation of Dr. Hideaki Shinoda (IPSHU) and Dr. Yuji Uesugi (IDEC) as the discussant led the lively discussion and proceeded to have a plan to publish a book with this outcome. (Coordinator: Tatsuo Yamane)

#### The 167th IDEC Asia Seminar

#### 講師 Speaker:

Dr. Subandono Diposaptono (Ministry of Marine Affairs and Fisheries, Indonesia)

#### 演題 Title:

The Impact of Global Warming on Indonesian Coasts

#### 日時 Date: January 15, 2009

The speaker is one of famous coastal engineers in Indonesia whose main subject is tsunami disaster prevention and coastal environment preservation. Adaptation measures to global warming in Indonesian coastal management were introduced with many data of coastal conditions observed in wide area of the country. The impact of global warming on Indonesian coasts cannot be ignored in the current situations, such as increase in high wave disasters and coastal erosion, coral reef degradation and sea level rise. The conclusion is that mangrove forestation may be the most effective measure to coastal protection in Indonesia. (Coordinator: Takao Yamashita)

## The 168th IDEC Asia Seminar

# 講師 Speaker:

Ms. Jing Yang (School of Traffic and Transportation, Beijing JiaoTong University, China)

#### 演題 Title:

Prediction of Urban Transport Development Under Public Transportation Priority Policies in Beijing Based on System Dynamics Model

#### 日時 Date: January 28, 2009

Ms. Jing Yang, as a visiting researcher of IDEC, gave a lecture on public transportation policies in Beijing, the host city of the 2008 Olympic Games. Before and after the Olympic Games, even though various transport policies and countermeasures have been taken, serious traffic congestion issues have not well resolved and are still troubling people's daily life in Beijing. Ms. Yang attempted to apply a system dynamics model to clarify the cause-effect relationships related to such issues. Based on scenario analysis results, she found that only a comprehensive transport policy package (e.g., pricing policies to car users, and public transportation priority

policies) could significantly reduce the use of passenger cars and increase the use of public transport systems. (Coordinator: Junyi Zhang)

#### The 169th IDEC Asia Seminar

#### 講師 Speakers:

Dr. Daichao Sheng (Professor, Faculty of Engineering and Built Environment, The University of Newcastle, Australia)

#### 演題 Title:

Large deformation and modeling of penetration problems in geo-mechanics

#### 日時 Date: February 25, 2009

In current geo-technical practice, it is common to assume that the deformation caused by loading is small so that the initial geometry of the problem can be used throughout the analysis. However, such a small-deformation assumption can lead to grossly inaccurate solutions for certain problems. For example, embankments and foundations built on soft clay deposits can undergo settlements in meters without failure. When analysing these problems, it is essential to consider the geometrical nonlinear caused by large deformation. (Coordinator: Haruyuki Yamamoto)

## The 170th IDEC Asia Seminar

# 講師 Speaker:

1) Prof. Zuosheng Yang (College of Marine Geoscience, Ocean University of China), 2) Dr. Dong-Lim Choi (Korea Ocean Research & Development Institute, KORDI)

#### 演題 Title:

Special Seminar of GELs Program Special Lecture: Three Gorges Dam Effects on Water Environment in Yangtze River-East China Sea System

#### 日時 Date: March 24, 2009

As a Special Seminar of GELs (Global Environmental Leaders) Program, two distinguished speakers are invited to talk about the current important issue in East Asia, "Three Gorges Dam Effects on Water Environment in Yangtze River-East China Sea System". One is a famous Chinese geologist, the expert of sediment system in Yangtze River Basin, who gave a lecture on effects of Three Gorges Dam to hydrological and sedimentological characteristics. The other is an oceanographer who is engaged in investigation of East China Sea using KORDI's observation tower. The conclusion of the seminar is the strong necessity of Japan-Korea-China collaboration in the environmental assessment of Yangtze River-East China Sea System. (Coordinator: Takao Yamashita)

#### The 171st IDEC Asia Seminar

#### 講師 Speaker:

1) Ahmed Baedowi (Direktur Pendidikan/Academic Director), 2) Satia Prihatini Zan (Direktur, Sekola Sukma Bangsa Bieruen/School Principal)

#### 演題 Title:

Education as a Means of Peacebuilding: A Case of Sukma Bangsa School in Aceh, Indonesia

#### 日時 Date: June 10, 2009

Sukma Bangsa School is a boarding school for children who were victims of either Tsunami or conflict in Aceh. The speakers talked about their attempt to help the children to overcome their grief and become leaders for peacebuilding in Aceh and beyond. They presented the school values of nonviolence, coexistence and tolerance, and underlined how it was difficult to alter the mindset of the conflict-affected children. They also provided some concrete cases of conflict resolution in the school focusing on the role of teachers and school councilors. They emphasized the importance of using local values and languages in resolving such conflicts in school and between the school and the community. They demonstrated that how Islamic values and language served to mitigate and resolve the conflict in and around the school. (Coordinator: Yuji Uesugi)

# The 172nd IDEC Asia Seminar

#### 講師 Speaker:

Bertha Osei-Hwedie (University of Botswana, Visiting Professor at IDEC, Hiroshima University)

#### 演題 Title:

Botswana: Indigenous Institutions, Civil Society and Government in Peacebuilding in Southern Africa

#### 日時 Date: June 10, 2009

The challenge of Peace building in Southern Africa is how to blend traditional practices and modern liberal methods of peace building into sustainable peace. The call for a prominent role for traditional institutions and civil society in peace building reflects the need to make indigenous institutions and civil society relevant and applicable to contemporary peace building efforts. Botswana uses indigenous norms and institutions of the Tswana traditional culture, institutions of chieftaincy and Kgotla (village assembly); modern democratic institutions such as civil society and the judiciary; and socio-economic development for conflict resolution and prevention, and governance. (Coordinator: Hideaki Shinoda)
