(Open to All HU Students, Faculty and Staff)
14:15-15:00 Discussion
(For Leading Graduate Program student and
faculty members, observation is accepted)

Hiroshima University has two graduate education programs that were adopted for the MEXT Leading Graduate Schools Initiative. These PhD programs intend to develop future global leaders through a combination of unique graduate school curriculum design, and invaluable collaboration with partner organizations representing industry, government, and academia. As we anticipate our first graduating class entering the global arena this upcoming fiscal year, with the insights and perspectives of Prof. Arimoto foremost in our minds, please take a moment to reflect on and discuss these new graduate programs. Let's consider and discuss aspects such as the educational achievements, their expected roles, their ongoing development and improvement, and ultimately, the success of the program graduates.

Registration: Please send an e-mail titled "Seminar" stating your name, affiliation and position to phoenix-program@office.hiroshima-u.ac.jp, by February 18.
