

27th November 2017 (H29)

Hiroshima University has started a new fund raising scheme

The year 2024 marks the 75th anniversary of the foundation of Hiroshima University. To take the opportunity, Hiroshima University has set up a new fund raising scheme called “広島大学が躍動し広島のを活性化させる基金 (it literally means ‘The fund for uplifting Hiroshima University and energizing the local communities of Hiroshima’)” with the intention of creating an environment where HU can be a dynamic player, enhancing collaboration with the local communities and industries, to enable HU to grow into a world’s pre-eminent university.

The new fund is to further enhance and develop existing “Hiroshima University Fund” of which objectives are to make contributions towards further enhancing activities concerning education/research/social contribution, streamlining and enhancing research and education environment, and cultivating distinguished intellectuals and attaining excellent research outcomes.

Upon starting to implement the fund, start-up donation is first to be made by the faculty and administrative members so as to raise fund money at university level.

With Higashi Senda Campus playing a pivotal role	With Kasumi Campus playing a pivotal role	With Higashi Hiroshima Campus playing a pivotal role
*Center of activities for creating new industries by Industry-Academia-Government collaboration and boosting the development of the local areas	*Establishing a Center of activities for creating new industries by Industry-Academia-Government collaboration and boosting the development of the local areas	*Establishing a Center of local innovation by Industry-Academia-Government collaboration with a perspective of going global.
*Establishing a center for peace creation, research & education and cultural activities by Industry-Academia-Government collaboration	*Establishing a center for International Medical Innovation	*Establishing a world's pre-eminent Center of Excellence for International Research & Education
*Establishing a Center of International Trade Innovation
